Describe Cause of Problem and Remedial Action Taken.*
During a thunder storm electrical power was lost to the injection pump, causing the tanks to overflow. Used vacuum trucks to pickup standing fluids inside berm Will contact Highlander (Tetra Tech) to assess the release area.

Describe Area Affected and Cleanup Action Taken.*
The fluids from the release were contained inside the facility berm. There was 8 bbls of oil and 250 bbls of produced and rain water picked up with vacuum trucks. A site assessment was completed and the areas of impact were excavated accordingly to depths ranging from 1.0' to 5.0'.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
