Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

NM OIL CONSERVATION
ARTESIA DISTRICT
DEC 02 2015
RECEIVED

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A failure occurred with a check valve on the LACT unit, causing the release of crude oil. Vacuum truck(s) and roustabout crews were called.

Describe Area Affected and Cleanup Action Taken.*

An approximate area of 168' X 30' was affected outside of the battery on the production pad. Vacuum trucks were called to recover the standing fluid and a backhoe was called to excavate impacted soil. Excavated soils will be hauled to a NMOCD approved facility. Vertical and horizontal delineation samples will be taken and analysis ran for TPH & BTEX. If initial analytical results for TPH & BTEX are under RRAL's (site ranking is 0) a Final Report, C-141 will be submitted to the OCD requesting closure. If the analytical results are above the RRAL's a work plan will be submitted to the OCD. **Depth to Ground Water: >100' (approximately 130'; Section 25, T21S-R31E, per Trend Map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: Release Notification (Wolf AJA Federal Battery)

Yates Petroleum Corporation is reporting a release at the following location (11/20/2015, 11:20 AM).

Wolf AJA Federal Battery
30-015-26777
Section 25, T21S-R31E
1980' FSL & 300 FEL
Eddy County, New Mexico

Released: 40 B/O; Recovered: 35 B/O.

A failure occurred with a check valve on the LACT unit causing the crude oil to be released in front of the battery containment (release DID NOT leave production pad). Vacuum truck(s) have been called to recover standing oil. A Form C-141 with complete information will be submitted.

Thank you,

Chase Settle, M.S.
