Attn: Phillip R. Goetze
Santa Fe, NM 87505

Dear sir or Madam:

Mack Energy Corporation is requesting administrative approval from the NMOCD for approval of surface commingling of production on our Fairbanks Federal Lease NMNM-28000 and our Seahawks Federal Lease NM-132677. Both Leases produce from the Round Tank; San Andres pool(52770) and will be commingled at a central tank battery located in the NWSE Sec. 19 T15S R29E. There are currently 2 producing wells within the Seahawks Federal TB. We anticipate drilling the Fairbanks Federal #2 soon.

Both leases have identical working interest ownership; however, a difference in overriding royalty ownership exists between the two leases. All interest owners have been notified of this application via certified mail.

Allocation for oil and gas will be done using periodic well tests at the TB shown in the facility diagram. Each well will be tested periodically to insure accurate allocation.

Should you have any questions please contact me @ 575-748-1288.

Sincerely,

Jerry W. Sherrell

Dear sir or Madam:

Mack Energy Corporation is requesting administrative approval from the NMOCD for approval of surface commingling of production on our Fairbanks Federal Lease NMNM-28000 and our Seahawks Federal Lease NM-132677. Both Leases produce from the Round Tank; San Andres pool(52770) and will be commingled at a central tank battery located in the NWSE Sec. 19 T15S R29E. There are currently 2 producing wells within the Seahawks Federal TB. We anticipate drilling the Fairbanks Federal #2 soon.

Both leases have identical working interest ownership; however, a difference in overriding royalty ownership exists between the two leases. All interest owners have been notified of this application via certified mail.

Allocation for oil and gas will be done using periodic well tests at the TB shown in the facility diagram. Each well will be tested periodically to insure accurate allocation.

Should you have any questions please contact me @ 575-748-1288.
