Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	
If a Watercourse was Impacted, Describe Fully.* Watercourse not impacted.		
Describe Cause of Problem and Remedial Action Taken.* The affected pipeline (California C [Pecos River]) was depressured to the atmosphere to facilitate the replacement of a section of pipeline that was previously clamped. The section of pipeline replaced was subject to additional leaks due to corrosive factors. This pipeline transports sweet field gas to gas processing plants downstream. Vent Coordinates: 32.06453N 103.80333W (BLM)		
Describe Area Affected and Cleanup Action Taken.* This blowdown was in response to a leak on this pipeline that occurred on 12/23/2015 where the leak was clamped. In this instance, the damaged section of pipe was replaced with new requiring that the pipeline be blown down again. A PIG was ran on the pipeline before the blowdown to avoid any liquid release; therefore, there were no soil impacts from this event.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
