side of form

**Release Notification and Corrective Action**

**OPERATOR**

Initial Report  Final Report

Name of Company	Southern Union Gas Services, Ltd.	Contact	Rose Slade
Address	801 S. Loop 464, Monahans, TX, 79756	Telephone No.	432-940-5147
Facility Name: MC-16" (RP-1511) Lea County Field Dept.		Facility Type	Natural Gas Gathering

Surface Owner	Wanda Jones	Mineral Owner: Fee	Lease No.
---------------	-------------	--------------------	-----------

**LOCATION OF RELEASE**

Unit Letter	Section	Township	Range	Feet from the	North/South Line	Feet from the	East/West Line	County
C	34	22S	36E					Lea

**Latitude N32 21.135      Longitude W103 15.345**

**NATURE OF RELEASE**

Type of Release	Crude Oil, Produced water and Natural Gas	Volume of Release	60 Bbbls Fluid and 80 MCF Nat. Gas	Volume Recovered	40 bbls crude oil and produced water
Source of Release	16" Natural Gas Pipeline	Date and Hour of Occurrence	Not known	Date and Hour of Discovery	7/21/07 Time: 7:00 p.m.
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? NMOCD on call representative			
By Whom?	Tony Savoie	Date and Hour: 7/21/07			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken:  
A 16" Natural Gas gathering line developed a leak due to excess fluid delivered by a producer caused the line to pressure up and leak fluid and natural gas. Crews began shutting the line in at 7:45 pm. Approximately 40 bbls of fluid was recovered before the line was shut in and allowed to blow down. A 200 ft. section of the 16" line was replaced on 7/23/07.

Describe Area Affected and Cleanup Action Taken. All of the affected area was contained to the lease road measuring approximately 1600 square feet. The final remediation will follow the NMOCD Guidelines for the remediation of leaks and spills.

**On or around August 9, 2007 remediation activities were conducted at the MC-16" Release Site by an environmental contractor that is no longer affiliated with the site. On October 3, 2012, the site was revisited in an effort to determine if soil exhibiting benzene, BTEX, TPH and chloride concentrations above NMOCD regulatory standards remained in-situ and collect confirmation soil samples. Laboratory analytical reports from the confirmation soil samples suggested previous remediation activities met the requirements of the NMOCD.**

**Please see the attached Basin Environmental Services Technologies Remediation Summary and Site Closure Request for details of remedial activities and the site investigation.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases, which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
