**Subject:** RE: Gadwell 18 Federal Com 3 Sampling Report/Work Plan

Reference: Cimarex Energy Co. \* Gadwall 18 Fed Com 3 \* 30-015-39964 \* D-18-25s-27e \* Eddy County, New Mexico  
NMOCD Tracking number: 2RP-1434 \* Date of release (unauthorized dumping event): 11/23/12

Terry,

OCD is in receipt of a proposal for remediation of the above referenced release. The proposal was submitted on behalf of Cimarex by SESI, Inc. The following suggestions/requests are subject to like approval by BLM: OCD would prefer to have additional material excavated in the area identified as "Bottom – Central" to achieve chloride levels at or less than 1000 mg/kg, and not install a liner. In reviewing the proposal, Google Earth was utilized to see the lay out of the location. The image observed was Imagery Date 1/22/13. Based on this satellite image of the site, it appears that there has been at least one (and possibly more) dumping incidents on this well pad. The more predominant "dump site" is just west of the well head and south/southeast of the current excavation, and appears to have occurred not long before the 1/22/13 date. OCD would request that this area be investigated for possible impact from what appears to be another dumping event. The proposal for the 11/23/13 release proposes to utilize material from downsizing the pad for backfill in the current excavation, and use at other sites. OCD will require any material from this site be tested prior to utilization at this or any other site. If this site has been targeted by "illegal dumpers", it is possible that there may have been other dumping events during 2013.

If you have any questions or concerns, please contact me.
