NATURE OF RELEASE

Type of Release: Produced Water	Volume of Release: 380 Bbls	Volume Recovered: 340 Bbls
Source of Release Pipeline valve located in a valve can	Date and Hour of Occurrence 7/13/2016	Date and Hour of Discovery 7/13/2016 - 2345 hrs MT
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom? NMOCD Heather Patterson & Michael Bratcher, BLM Shelly Tucker	
By Whom? Karolina Blaney	Date and Hour: 7/14/16- 1645 hrs MT	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	

If a Watercourse was Impacted, Describe Fully.* N/A

Describe Cause of Problem and Remedial Action Taken.*

The cause of the spill is equipment failure; a poly line running from the tank farm to an injection well ruptured. The compromised section of the line is located outside the SPCC containment but there was enough pressure in the line to spray it into the containment. The vast majority of spilled water was contained inside the dirt containment berm, approximately 5 bbls of produced water was sprayed outside the containment on the access road.

Describe Area Affected and Cleanup Action Taken.*

The impacted area of the access road was scraped and impacted dirt was hauled off to a disposal facility. The access road will be sampled for BTEX and TPH in accordance with NM OCD Guidelines for Remediation of Leaks, Spills, and Releases. The impacted area will also be sampled for chlorides as required by BLM. Further remediation will be based on these results. The total ranking score for this site is 0 and the site will be remediated to levels specified in 0-9 column of the Guidelines document. This spill did impact any undisturbed land/pastures.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: WPX - Brushy Draw Tank Farm - spill notification

Good afternoon,
WPX had a produced water spill last night at the Brushy Draw Tank Farm. The Tank Farm is located south of the FED USBH 1 well, API # 30-015-24034. The legal description is S25, T26S, R29E. Coordinates: 32.0056803, -103.9439288. The cause of the spill is equipment failure; a poly line running from the tank farm to an injection well ruptured. The compromised section of the line is located outside the SPCC containment but there was enough pressure in the line to spray it into the containment. The vast majority of spilled water was contained inside the dirt containment berm, approximately 5 bbls of produced water was sprayed outside the containment on the access road. The total volume spilled and recovered is unknown as we are adding up the hauling tickets but it is expected to be more than 100 bbls. I will be submitting the C-141 and NTL-3A (if preferred) in the next 15 days. However, please don't hesitate to call if you have any questions, comments, or concerns.
Thank you and have a great afternoon,
