*Re: Notice to Owl SWD Operating, LLC to Conduct Injection Survey on its Maralo Sholes B Well No.2 located in Section 25, T25S, R36E, Lea County, New Mexico.*

Dear Mr. Catanach,

Owl SWD Operating, LLC has received your letter requesting an injection survey to be conducted on the subject well.

Owl agrees with the need for verification and would like to get the best survey data possible to confirm the intervals and formations receiving injection.

Owl personnel are currently involved in several other projects and workovers including; pipeline construction and automation modifications, equipment upgrades and repair, a well workover to temporarily abandon and a tubing modification. Unfortunately, limited field personnel are available due to some recent staff adjustments. However, they will organize schedules to bring this need to top priority.

At this time, Owl would like to respectfully request a 30-day extension for the deadline to perform the survey. This request would set a deadline of September 9, 2016, 30 days from today. Owl will make every effort to conduct the survey prior to that date by reprioritizing existing field activities but will accomplish it no later than that date.

Best regards,

Ben Stone, Partner
