If a Watercourse was Impacted, Describe Fully.*	N/A				

Describe Cause of Problem and Remedial Action Taken.*
Poly flow line from well ruptured in area of pasture. Pumping unit was shut down and valves were closed for repairs.

Describe Area Affected and Cleanup Action Taken.*
The leak affected approximately 8,170 square feet of pasture (most of area misted) located north of the well. Free standing fluids were recovered.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Here is the initial C-141 for a leak that occurred in the pasture just off the north side of the Hudson 1 Federal 7 well location. FYI, there was an old reserve pit that was recapped with plastic and soil in 2014, located within the south part of the leak area over which a portion of the overspray occurred. I will confirm boundaries.
