Re: Administrative Approval to Commingle
Breech "B" 781, Section 14, Township 26N, Range 7W, Unit Letter L
Basin Dakota, Ice Canyon Gallup, and Blanco Mesa Verde Formations

Dear Mr. Catanach:

This well was originally proposed to be completed as a dual completion with Dakota - Mesa Verde commingled below a packer and Chacra above. NMOCD order R-10964 approved the commingling of Dakota - Mesa Verde with a completed C-107-A (order attached).

Caulkins Oil Company now plans to complete well in the Ice Canyon; Gallup formation and requests administrative approval to dual complete well as a commingled Dakota - Gallup - Mesa Verde below a packer and Chacra above.

Dugan Production Corporation recently received approval to commingle these three pools in their Mona Lisa #2 well located in section 14-26N-7W, unit letter J, by NMOCD order DHC-1920. This well has been completed and is currently producing approximately 600 MCF/D from the commingled zones.

Allocation percentages and volumes were calculated using the average production from the April and May monthly volume statements for the Dakota and Gallup zones in our Breech 377 well. Allocation for the Mesa Verde zone was calculated using 1997 production history from Mesa Verde wells operated by Caulkins Oil Company in sections 13 and 14 of township 26N, range 7W.

Please find the enclosed documents:

- A. Form C-107-A
- B. Form C-102 for each zone
- C. Copy of order # DHC-1920
- D. Copy of order # R-10964
- E. Notification list of offset operators
- F. Vicinity map
- G. Sundry notice notifying BLM of intentions to commingle.

If you have any questions or need more information, please contact Robert L. Verquer at (505) 632-1544.

Sincerely,

A handwritten signature in cursive script, reading "Robert L. Verquer". The signature is written in dark ink and is positioned above the typed name.

Robert L. Verquer,

ADMINISTRATIVE ORDER DHC-1920

Dugan Production Corporation
P.O. Box 420
Farmington, New Mexico 87499-0420

Attention: Mr. John Alexander

RECEIVED
MAY 19 1998
OIL CON. DIV.
DIST. 3

*Mona Lisa No. 2
API No. 30-039-25745
Unit J, Section 14, Township 26 North, Range 7 West, NMPM,
Rio Arriba County, New Mexico.
Ice Canyon-Gallup (Gas - 93235),
Basin-Dakota (Prorated Gas - 71599) and,
Blanco-Mesaverde (Prorated Gas - 72319)*

Dear Mr. Alexander:

Reference is made to your request for an amendment to Division Order No. R-10963, which authorized the downhole commingling of Basin-Dakota and Blanco-Mesaverde Gas Pool production within the subject well, to add the Ice Canyon-Gallup Gas Pool as a third commingled zone in the wellbore.

It appearing that the subject well qualifies for approval for such amendment pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the zones is hereby placed in abeyance.

The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis:

Blanco-Mesaverde Gas Pool	Oil 30%	Gas 30%
Basin-Dakota Gas Pool	Oil 45%	Gas 45%
Ice Canyon-Gallup Gas Pool	Oil 25%	Gas 25%

Administrative Order No. DHC-1920
Dugan Production Corporation
May 11, 1998
Page 2

The allocation method established herein may be altered at some time subsequent to initiating downhole commingling operations upon request by the operator and for good cause shown.

REMARKS: The operator shall notify the Aztec District Office of the Division upon implementation of the commingling process.

Pursuant to Rule 303.H., the commingling authority granted herein may be rescinded by the Division Director if conservation is not being best served by such commingling.

Approved at Santa Fe, New Mexico on this 11th day of May, 1998.

OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION FOR THE PURPOSE OF
CONSIDERING:**

**CASE NO. 11920
Order No. R-10964**

**APPLICATION OF CAULKINS OIL COMPANY
FOR COMPULSORY POOLING AND DOWNHOLE
COMMINGLING, RIO ARriba COUNTY, NEW
MEXICO.**

ORDER OF THE DIVISION

BY THE DIVISION:

This cause came on for hearing at 8:15 a.m. on February 5, 1998, at Santa Fe, New Mexico, before Examiner David R. Catanach.

NOW, on this 2nd day of March, 1998, the Division Director, having considered the testimony, the record, and the recommendations of the Examiner, and being fully advised,

FINDS THAT:

- (1) Due public notice having been given as required by law, the Division has jurisdiction of this cause and the subject matter thereof.
- (2) Division Case Nos. 11897, 11899 and 11920 were consolidated at the time of the January 8th hearing for the purpose of testimony. No additional appearances were entered in this case at the February 5th hearing.
- (3) The applicant, Caulkins Oil Company, seeks an order pooling all mineral interests in the Blanco-Mesaverde and Basin-Dakota Gas Pools underlying the S/2 of Section 14, Township 26 North, Range 7 West, NMPM, Rio Arriba County, New Mexico, thereby forming a standard 320-acre gas spacing and proration unit for said pools. This unit is to be dedicated to its proposed Breech "B" 781 well to be drilled at a standard gas well location 1800 feet from the South line and 1150 feet from the West line (Unit L) of Section 14.
- (4) The applicant further seeks authority to downhole commingle Blanco-Mesaverde and Basin-Dakota Gas Pool production within the subject well.

CASE NO. 11920

Order No. R-10964

Page -2-

(5) By Order No. R-10961, issued in companion Case No. 11899 on February 18, 1998, the Division, upon application of Dugan Production Corporation, established two 160-acre non-standard gas spacing and proration units in the Blanco-Mesaverde and Basin-Dakota Gas Pools comprising the SE/4 and SW/4 of Section 14, Township 26 North, Range 7 West, NMPM.

(6) As a result of the issuance of Order No. R-10961, the portion of the immediate case seeking to compulsory pool the interests within the S/2 of Section 14, thereby forming a standard 320-acre gas spacing and proration unit for the Blanco-Mesaverde and Basin-Dakota Gas Pools, is unnecessary and should therefore be dismissed.

(7) The evidence and testimony presented in this case indicates that:

- a) Caulkins proposes to commingle the Blanco-Mesaverde and Basin-Dakota Gas Pools and dually complete these commingled zones with the Chacra formation within the subject Breech "B" 781 well;
- b) a well drilled within the S/2 of Section 14 should encounter marginal gas production only from the Blanco-Mesaverde and Basin-Dakota Gas Pools;
- c) the estimated bottomhole pressures within the Mesaverde and Dakota formations are expected to exceed the requirements set forth in Division Rule No. 303.C., which states that the Division may grant administrative approval for downhole commingling provided that the bottomhole pressure of the highest pressured commingled zone does not exceed the original reservoir pressure of any other commingled zone in the wellbore, adjusted to a common datum. Administrative notice was taken in this case of the engineering evidence and testimony presented in Case No. 11815, in which case Conoco Inc. demonstrated that even though the bottomhole pressure of the Dakota formation exceeds the original bottomhole pressure of the Mesaverde formation, there is no possibility of damage to the Mesaverde formation, nor will there be any loss of reserves, waste, or violation of correlative rights. Conoco presented this evidence in support of a downhole commingling request for its San Juan 28-7 Unit which is located approximately four miles northwest of the proposed Breech "B" 781 well.

CASE NO. 11920

Order No. R-10964

Page -3-

(8) At this time, the applicant seeks only an exception to the pressure requirements contained within Division Rule No. 303.C., as described above. The applicant testified that it will file a Division Form No. C-107-A subsequent to the entry of this order.

(9) The evidence and testimony in this case is sufficient to grant an exception to the pressure requirements for administrative approval for downhole commingling within the proposed Breech "B" 781 well.

IT IS THEREFORE ORDERED THAT:

(1) The application of Caulkins Oil Company for an order pooling all mineral interests in the Blanco-Mesaverde and Basin-Dakota Gas Pools underlying the S/2 of Section 14, Township 26 North, Range 7 West, NMPM, Rio Arriba County, New Mexico, thereby forming a standard 320-acre gas spacing and proration unit for said pools, said unit to be dedicated to its proposed Breech "B" 781 well to be drilled at a standard gas well location 1800 feet from the South line and 1150 feet from the West line (Unit L) of Section 14, is hereby dismissed.

(2) The applicant, Caulkins Oil Company, is hereby granted an exception to the pressure requirements for administrative approval for downhole commingling as contained within Division Rule No. 303.C., for its proposed Breech "B" 781 well, which is to be drilled at a standard gas well location 1800 feet from the South line and 1150 feet from the West line (Unit L) of Section 14, and which is proposed to be downhole commingled in the Blanco-Mesaverde and Basin-Dakota Gas Pools.

(3) In order to obtain administrative approval to downhole commingle Blanco-Mesaverde and Basin-Dakota Gas Pool production within the aforesaid Breech "B" 781 well, the applicant shall file a Division Form No. C-107-A complete with all attachments.

(4) Jurisdiction of this cause is retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
