<b>Was a Watercourse Reached?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<b>If YES, Volume Impacting the Watercourse</b> N/A	

**If a Watercourse was Impacted, Describe Fully.\*** N/A

**Describe Cause of Problem and Remedial Action Taken.\***

Lightning struck a 500 BBL fiberglass oil tank causing it to catch on fire. Upon arrival of the lease operator the well was immediately shut in and the fire was extinguished by the Carlsbad Fire Department.

**Describe Area Affected and Cleanup Action Taken.\***

Approximately 15 BBLS oil were burnt up inside the oil tank and 32 BBLS of produced water evaporated from the water tank sitting next to the oil tank due to the extreme heat of the fire. All fluids remained inside the tanks and none were released to the ground.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Good Morning,

Please find attached the Initial & Final C-141 and GIS Image of the State CW 2 fire that occurred on 7/3/2017. Please be advised that the blue dot on the GIS Image represents the location of the fire.

Please contact me with any questions you may have.

Thank you and have a great week!

Respectfully,

*Sarah Gallegos-Troublefield*
