RE: Administrative Order SWD-1591; First Extension of Deadline to Commence Injection

Forty Niner Ridge SWD Well No. 1 (API 30-015-Pending)

Unit L, Sec 11, T19S, R28E, NMPM, Eddy County, New Mexico

Order Date: October 28, 2015

Injection into Devonian formation; permitted interval: approximately 15545 feet to 16500 feet

Dear Mr. Harrington:

Reference is made to your request on behalf of Mewbourne Oil Company (the "operator") to extend the deadline stipulated in order SWD-1591 based upon the approval date of October 28, 2015, to commence injection for the above referenced well for an additional one year for reasons outlined in the attached correspondence.

It is the Division's understanding from your request that there have been no significant changes in the information provided in the application submitted for review and approval of this order. These changes include the completion of new wells within the Area of Review that penetrated the approved injection interval and any changes in ownership.

The Division finds that granting this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment.

The deadline to commence injection for the existing order is hereby extended until October 28, 2018. All requirements of the above referenced administrative order and agreements in the application

SWD-1591: First Extension of Deadline to Commence Injection
Mewbourne Oil Company
August 10, 2017

Subject: RE: Extension for the Forty Niner Ridge SWD No. 1: SWD-1591

Hi Phil:

I checked the ½ mile radius and there are not any new wells that have been drilled since the original permit was approved.

I have found one commercial SWD completed in the Delaware that is within the ½ mile radius and the operator was not notified during our original application. Would they be considered an affected party?

The reason why I'm asking this is because there is a upcoming hearing where there are two SWD operators trying to drill Devonian wells in the same section. Operator 1 had an approved SWD and drilling permits before Operator 2 filed for a new SWD permit within ½ mile. I talked to Mike about this case and he told me that Operator 2 is not required to send a copy of the permit application to Operator 1.

Thanks.

Tim:

The Division received Mewbourne's request for the extension for the Forty Niner Ridge SWD No. 1 and this will prevent any termination due to the two-year injection commencement clause. However, I will need an additional e-mail/correspondence from Mewbourne with two verifications – that there is no change in the AOR wells and that the affected parties noticed for the original application are the same. If either of these items have changed, then additional effort will be required (new affected parties will be required to be noticed and new AOR wells will be required to be diagrammed and submitted for consideration as an addendum to the original application). An example by WPX/RKI is provided. Please contact with any questions in this matter. Thanks. PRG

Sec 22, Twp 23S, Rge 30E
Eddy County, NM

Dear Mr. Jones:

The purpose of this letter is to request a one year extension for SWD-1591 that is scheduled to expire on October 27, 2017. Mewbourne Oil Company has oil and gas drilling activity scheduled in this area in 2017, and we would like to retain this permit until we have completed our evaluation.

Please contact me if you have any questions regarding our request.

Very truly yours,

Tim Harrington
