Dear Mr. Stogner:

Burlington Resources is applying for administrative approval of an unorthodox gas well for the Basin Fruitland Coal formation. We apologize for the oversight by Burlington Resources in which no administrative approval was ever applied for before drilling this well.

The subject well was staked and drilled at the above referenced location due to steep terrain, archaeology, and a major highway with above ground utilities adjacent, as shown on the attached maps. The Fruitland Coal has a standard dedicated spacing unit of 320 acres, encompassing the south half of Section 24, T30N, R12W.

The following attachments are for your review:

- Intent to Drill by Southwest Production Co in 1962
- Approved plug back & recompletion to the Fruitland Coal sundry
- C-102 Plat
- Offset operators plat
- 9 Section Plat
- Topographic Map of Section 24

Again, we apologize for the oversight on our part concerning this matter. Copies of this application are being submitted to offset operator / working interest owners by certified mail. Please let me know if you have any questions about this application.

Sincerely,

Joni Clark
