If a Watercourse was Impacted, Describe Fully.* N/A		

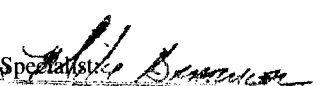

Describe Cause of Problem and Remedial Action Taken.*

This was a Trespassing incident that occurred on a Devon Energy leasehold. Multiple tanks were placed at the request of a pipeline installation company performing work for a pipeline company this work is not related to any Devon operations in this area. Devon did not order the tanks nor were we contacted and asked permission to have the tanks placed on our location. Devon was only made aware of the fire that occurred because we were contacted by the fire department who extinguished the fire which occurred on the tanks which were set by the 3rd party contractor.

Describe Area Affected and Cleanup Action Taken.*

After reviewing this incident with OCD, Devon is submitting this in cooperation with OCD to allow a path for this incident to be closed.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Crystal,
Attached is an Initial/Final C-141 for this Trespass Incident. I have included the original C-141 submitted by Juniper Tanks in this submittal package for your reference. If you have any questions let me know.

Thanks,

Mike Shoemaker

Subject: [EXTERNAL] Initial C-141 document submitted by Juniper Tanks LLC - Unable to process

Hello all,

OCD District II Office received a faxed Initial C-141 form today from a non-operator reporting a release that had occurred on what appears to be a federal administered surface location. I spoke with a representative of the organization called Juniper Tanks LLC of whom which had submitted this Initial C-141 form to us. They stated that they were told they had to be the one to turn in the C-141 regulatory form to us cause it was their tanks that had an issue at the location. I informed them that if the location is a location leased by Devon Energy then Devon Energy needs to report the release to all appropriate parties. They were very insistent that they were told that they must be the ones to fill out the form.

Devon Energy folks, please make sure that all members of your organization who are willing to speak to or offer to dictate what our OCD reporting procedures involve/require that they are properly versed of such matters before doing so.

I also told this person from Juniper Tanks LLC that if they had some sort of liability for the release then that was between them and Devon to figure out. We are unable to accept this C-141 form as it is not properly produced. **OCD requires that Devon Energy inform OCD (as well as any other relevant regulatory parties) on the matters of this release as soon as possible.**

Thank you,

Crystal Weaver

NATURE OF RELEASE

Type of Release unknown-	Volume of Release appears less than one barrel	Volume Recovered All
Source of Release Frac tank	Date and Hour of Occurrence 10/10/17 approximately 6pm	Date and Hour of Discovery 10/10/17 6pm.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? We were notified	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

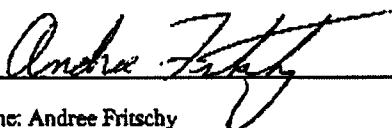

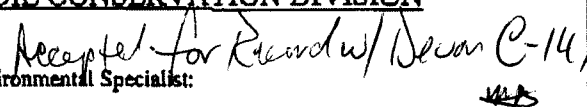

Describe Cause of Problem and Remedial Action Taken.*

An unknown flammable substance was dumped into our Frac tank on location. The tank contained fresh water. Frac tank caught fire (someone tossed a cigarette). It appears less than a barrel leaked as the tank still contained 80 barrels.

Describe Area Affected and Cleanup Action Taken.*

Fire department put out fire and residual water was removed approximately 10 barrels.
