# BELOW GRADE TANK (BGT) CLOSURE PLAN

**Site Name:**

**Central Bisti Unit (CBU) Injection Plant**

**BGT 1**

Unit Letter: "O", Section 05, T25N-R12W

San Juan County, NM

Latitude 36.423636 Longitude -108.133583

**Submitted By:**

Amy Archuleta

DJR Operating, LLC

PO BOX 156 Bloomfield, NM 87413

(505) 632-3476 x201

March 2018

**Closure Plan:**

In accordance with 19.15.17.13 NMAC, the following plan describes the closure requirements of the existing Below Grade Tank (BGT) at the **Central Bisti Unit (CBU) Injection Plant** well site owned and operated by DJR Operating, LLC. CBU Injection plant is in San Juan County, NM approximately **27.4 miles**, by road

- 1) DJR Operating, LLC, shall dispose of all wastes at a division-approved facility.
- 2) DJR Operating, LLC will not commence closure without first obtaining approval of the closure plan submitted with this registration.
- 3) DJR Operating, LLC shall test the soils beneath the BGT as follows:
  - a. At a minimum, a five-point composite sample to include any obvious stained or wet soils, or other evidence of contamination shall be taken under the liner or BGT and that sample(s) shall be analyzed for constituents listed in Table 1 of 19.15.17.13 NMAC (below).
  - b. If any contaminant concentration is higher than the parameters listed in Table 1 of 19.15.17.13 NMAC (below) the division may require additional delineation upon review of the results and DJR must obtain approval before proceeding with closure.
  - c. If all contaminant concentrations are less than or equal to the parameters listed in Table 1 of 19.15.17.13 NMAC (below), then DJR may proceed to backfill the excavation with non-waste containing, uncontaminated, earthen material.
  - d. This site is >100 feet to groundwater based on the Gallegos wash, the prominent water feature, the BGT location elevation, and a water well, SJ-1716, located in NE/SW Section 1- T25N-R12W (36.427617 -108.063778).

#### Timing and Requirements and Closure Methods for Below-Grade Tanks

1. Within 60 days of conclusion of operations, DJR shall remove liquids and sludge from the BGT prior to implementing a closure method and shall dispose of liquids and sludge in a division-approved facility.
2. Within six (6) months of conclusion of operations, DJR shall remove the BGT and dispose of it in a division-approved facility or recycle, reuse, or reclaim it in a manner that the appropriate district office approves. If there is any equipment associated with the BGT, then DJR shall remove the equipment, unless the equipment is required for some other purpose.
3. DJR shall notify the surface owner by certified mail, return receipt requested, by hand delivered and surface owner signed letter, or if surface is owned by Bureau of Land Management (BLM), by sundry notice, that DJR plans closure operations at least 72 hours, but not more than one week, prior to any closure operation.

Notice shall include operator name, facility name, NMOCD permit number (if given), and location to be closed by unit letter, section, township, and range.

4. DJR shall notify the NMOCD, District 3-Aztec Office, that DJR plans closure operations, via email, at least 72 hours, but not more than one week, prior to any closure operation. Notice shall include operator name, facility name, NMOCD permit number (if given), and location to be closed by unit letter, section, township, and range.

#### **Reclamation of BGT Locations**

1. Once the area associated with the BGT is no longer in use, DJR shall reclaim the BGT location and all areas associated with the BGT including associated access roads to a safe and stable condition that blends with the surrounding undisturbed area. DJR shall substantially restore the impacted surface area to the condition that existed proper to oil and gas operations by placement of soil cover as provided in Paragraph (2) in Subsection H of 19.15.17.13 NMAC, recontour the location and associated areas to a contour that approximates the original contour and blends with the surrounding topography and revegetate according to Paragraph (5) in Subsection H of 19.15.17.13 NMAC.
2. DJR shall replace topsoil and subsoil to their original relative position and contoured to achieve erosion control, long term stability, and preservations of surface water flow patterns. The disturbed area shall be reseeded in the first favorable growing season following the closure of the facility.
3. Reclamation of all disturbed areas no longer in use shall be considered complete when all ground surface disturbing activities at the facility have been completed, and uniform vegetative cover has been established that reflects a life-form ratio of plus or minus fifty percent (50%) of pre-disturbance levels and a total of percent plant cover of at least seventy percent (70%) of pre-disturbance levels, excluding noxious weeds.
4. In areas reasonably needed for facility operations, DJR shall compact, cover, pave, or otherwise stabilize and maintain the areas in such a way as to minimize dust and erosion to the extent practicable.

#### **Closure Report**

1. Within 60 days of closure completion, DJR shall submit a closure report on Form C-144, with necessary attachments to document all closure activities including sampling

results; information on back-filling, and covering, where applicable. In the closure report, DJR shall certify that DJR has complied with all applicable closure requirements and conditions specified in the closure plan.

2. The closure report will include the following:
  - a. Proof of closure notice to surface owner and NMOCD;
