RE: Condition of Approval for Extension  
Section 30 Recycling Containment and Facility #3RF-3  
June 4 – July 8

NMOCB  
JUL 17 2018  
DISTRICT III  
C 7/17/18

Dear Mr. Perrin,

Pursuant to Order R-14314, WPX submitted a C-103 for a 6-month extension request for cessation of operations on August 23, 2017, for the Section 30 Recycling Containment and Facility (#3RF-3) located in Section 30, Township 31N, Range 5W, Rio Arriba County, New Mexico. Approval of the 6-month extension was granted by Director David Catanach on August 25, 2017. Conditions of Approval (COA) of the C-103 are listed below. This report is being submitted to satisfy the monthly report requirement.

### 1.0 Conditions of Approval

Approval of the extension was granted with the following COA:

- 1) Take necessary actions to keep fresh water accumulation within the containment to a minimum and prevent damage from freezing.
- 2) Inspect and take photographs of the Facility weekly.
- 3) In the event of leaks or damage to the Facility, the operator must do the following.
  - a. Notify OCD District III within 72 hours of knowledge of leaks or damage.
  - b. Submit a Corrective Action Plan (CAP) to repair leaks or damage within seven days of notification above.
  - c. Upon OCD's approval of the CAP, complete repairs per the OCD-approved schedule.
- 4) By the 15<sup>th</sup> of the month, submit monthly reports to OCD District III of inspection results with photographs and progress on CAP's if any.
- 5) Verify liner integrity before returning the containment to service.

### 2.0 Weekly Inspections

LOGOS continues to monitor the condition of the Section 30 Recycling Containment. Attached is a summary of weekly inspections conducted at the containment from June 4 – July 8. Also attached is a photograph log documenting site conditions during June 4 – July 8.

**Section 30 Recycling Containment and Facility  
July 2018 Monthly Report**

**3.0 Recent Event Summary**

- No new leaks have been discovered and previous repairs have held. The approximately 4000bbbls water from storage tanks that was put on top of liner 5/10/18 has not been drained from containment.
- A minimal amount of water was pumped from leak detection between the weeks of June 4 and July 8. Received rain for a few days from 6/16 through 7/8/18.
- Storage tanks were removed week of 6/25/18.
- LOGOS personnel continue to search and inspect the liner for any potential areas of concern along the base of the containment

This report was submitted on 7/16/18 as the 15<sup>th</sup> was a Sunday. The next report will be submitted to the Aztec office by August 15, 2018. For additional information or questions regarding current site conditions, please contact me at 505-324-4145.

Sincerely,

Tamra Sessions  
Regulatory Specialist

---	---	---	---	---

8. IS THERE WATER PRESENT IN THE LEAK DETECTION TUBE?

YES	NO								
	NO								

9. DEAD WILDLIFE/BIRDS INSIDE CONTAINMENT?

YES	NO								
	NO								

COMMENTS: (include water quality, odor, color, etc.)

fresh water still in pond--leak detection still the same--1" in a 5 gallon bucket in 1 minute.	doing leak detection. This week getting 1 inch in a 5 gallon bucket, in less than 1 minute	did leak detection-for the first days the detection put 4 gallon in a 5 gallon bucket in 3mins and 49 seconds.As the week went on it went back to normal. 2 inches in a bucket and the pump shut down on low flow.	Leak detection is still the same 2 to 3 inches in a 5 gallon bucket in 1min to 45 seconds than the pump shut down on low flow.	The leak detection is still the same.Received a little rain so there is a little more water in the pond
--	--	--	--	---

ADDITIONAL OBSERVATIONS:

	got rain over the week end, have extra water in pond,		The flow back tanks were removed from location.
