Was this a major release as defined by 19.15.29.7(A) NMAC?  <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, for what reason(s) does the responsible party consider this a major release?  Major release defined by the spill volume >25 barrels.
If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)? Yes, Matthew Krakow notified Jim Griswold, Vanessa Fields, and Cory Smith by email and left voicemails for Jim Griswold and Vanessa Fields.	

### Initial Response

*The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury*

<input checked="" type="checkbox"/> The source of the release has been stopped. <input checked="" type="checkbox"/> The impacted area has been secured to protect human health and the environment. <input checked="" type="checkbox"/> Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices. <input checked="" type="checkbox"/> All free liquids and recoverable materials have been removed and managed appropriately.	
If all the actions described above have <u>not</u> been undertaken, explain why:  	
Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

## Site Assessment/Characterization

*This information must be provided to the appropriate district office no later than 90 days after the release discovery date.*

What is the shallowest depth to groundwater beneath the area affected by the release?	_____ (ft bgs)
Did this release impact groundwater or surface water?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a wetland?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release overlying a subsurface mine?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release overlying an unstable area such as karst geology?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within a 100-year floodplain?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Did the release impact areas <b>not</b> on an exploration, development, production, or storage site?	<input type="checkbox"/> Yes <input type="checkbox"/> No

Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.

**Characterization Report Checklist:** *Each of the following items must be included in the report.*

- ☐ Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring wells.
- ☐ Field data
- ☐ Data table of soil contaminant concentration data
- ☐ Depth to water determination
- ☐ Determination of water sources and significant watercourses within ½-mile of the lateral extents of the release
- ☐ Boring or excavation logs
- ☐ Photographs including date and GIS information
- ☐ Topographic/Aerial maps
- ☐ Laboratory data including chain of custody

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

## Remediation Plan

**Remediation Plan Checklist:** *Each of the following items must be included in the plan.*

- ☐ Detailed description of proposed remediation technique
- ☐ Scaled sitemap with GPS coordinates showing delineation points
- ☐ Estimated volume of material to be remediated
- ☐ Closure criteria is to Table 1 specifications subject to 19.15.29.12(C)(4) NMAC
- ☐ Proposed schedule for remediation (note if remediation plan timeline is more than 90 days OCD approval is required)

**Deferral Requests Only:** *Each of the following items must be confirmed as part of any request for deferral of remediation.*

- ☒ Contamination must be in areas immediately under or around production equipment where remediation could cause a major facility deconstruction.
- ☒ Extents of contamination must be fully delineated.
- ☒ Contamination does not cause an imminent risk to human health, the environment, or groundwater.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**Current Remediation Actions (Hospah Station)**

Western Refining has initiated the remediation process at the Hospah site. The initial actions included isolation of the station and termination of the release of oil, containing the spill, and recovering the free product with vacuum trucks and absorbent materials. Western has continued the remediation efforts by excavating the impacted soils at the site. Western is currently working with the local district office to collect confirmation sampling for the first clean-up area. Impacted soils have been characterized and are being disposed of at Envirotech's land farm. Additional remediation is still required and is ongoing.

## Fields, Vanessa, EMNRD

---

**From:** Fields, Vanessa, EMNRD  
**Sent:** Tuesday, October 16, 2018 9:46 AM  
**To:** Krakow, Matthew J  
**Cc:** Smith, Cory, EMNRD  
**Subject:** Western Refinery Hospah Station Deferment Request

Good morning Matt,

The OCD has reviewed Western Refinery's deferment request for leaving impacts in place "only" under the 3-foot reinforced concrete pad and approves Western's deferment request with the following conditions of approval:

- The OCD grants the deferment only under the 3-foot reinforced concrete pad. Western will continue to remediate the remainder of the release to the following standard referenced in Table 1 of 19.15.29. ≤50 feet.

Chloride***	600 mg/kg
TPH (GRO+DRO+MRO)	100 mg/kg
BTEX	50 mg/kg
Benzene	10 mg/kg
- Western will need to apply an oxidizer on the below ground surface of the concrete pad prior to backfilling. OCD must be notified of oxidizer type and notice of application, application rate and photos of completed oxidizer application.
- Western, will remediate the impacts at P&A or earlier if the becomes accessible for any reason.
- Western will notify the OCD prior to starting remediation of the deferred area.
- Western will include this approval in the "Final" C-141.
- Western will submit a final C-141 upon completing remediation efforts excluding the deferred area.

Please let me know if you have any questions.

Thank you,

**RE: Hospah Station Deferment Request  
Hospah Station  
McKinley County, New Mexico**

Dear Ms. Fields:

LT Environmental, Inc. (LTE) on behalf of Western Refining Pipeline, LLC. (Western) presents the following deferment request for remediating impacted soil located beneath a newly installed concrete pad that will house oil transfer pumps required for facility operations at the Hospah Station (Site) in Section 1 of Township 17 North, Range 9 West in McKinley County, New Mexico. This deferment request is being presented prior to completion of remediation activities. Western requests to backfill portions of the excavation where sample results indicate excavation activities are complete and where impacted soil that will be left in place has been delineated beneath the recently installed concrete pad. This will allow the station to be returned to service while additional remediation is completed.

## **BACKGROUND**

On September 8, 2018, the failure of an oil transfer pump resulted in the release of 925 barrels (bbls) of crude oil at the Site. In response to the release, Western isolated the station, contained the release, used vacuum trucks to recover free standing oil, and initiated excavation activities. Approximately 821 bbls of crude oil were recovered.

Depth to groundwater at the Site is estimated to be greater than 100 feet below ground surface (bgs) based on data for the nearest permitted water well, C-96623, located 2,263 feet to the northwest. Depth to groundwater in the well is 580 feet bgs and total depth of the well is 780 feet bgs. The Site is located less than 300 feet from Sandoval Arroyo to the south. The Site is greater than 200 feet from a lakebed, sinkhole, or playa lake and greater than 300 feet to a permanent residence, school, hospital, institution, church, or wetland. The Site is greater than 1,000 feet to a freshwater well or spring and is not within an unstable area, 100-year floodplain, or overlying a subsurface mine. Based on these criteria, the following New Mexico Oil Conservation Division (NMOCD) remediation action levels apply: 10 milligrams per kilogram

(mg/kg) benzene; 50 mg/kg total benzene, toluene, ethylbenzene, and total xylenes (BTEX); 100 mg/kg total petroleum hydrocarbons (TPH), and 600 mg/kg chloride.

## REMEDIATION ACTIVITIES

On September 9, 2018, Western began excavation activities where impacted soil was observed, starting with the areas closest to the oil transfer pumps and moving west and north, excavating around piping and other infrastructure as it was encountered. The approximately 60-foot by 16-foot concrete pad is located in the release footprint, which required excavation activities to be conducted around the recently installed concrete pad. An area south of the concrete pad was excavated to an average depth of approximately 6 feet bgs; the south trench excavation area is represented by sections 1 through 4 on Figure 1. A trench north of the concrete pad was excavated to an average depth of approximately 8 feet bgs, represented as North Trench on Figure 1. An area west of the recently installed concrete pad was excavated to an approximate depth of 8 feet bgs, between the concrete pad for the oil transfer pumps and a second concrete pad that was the foundation of a former out-building. Although visible on the aerial on Figure 1 and Figure 2, the former out-building concrete pad was removed as part of the excavation activities and soil beneath it has been removed. The excavated area west of the recently installed concrete pad is represented as Section 5 on Figure 1. A small area was excavated to the east of the concrete pad; however no impacted soil was encountered in this east area. Additional excavation continues northwest of the recently installed concrete pad and west of the former out-building concrete pad. An Envirotech, Inc. technician is conducting excavation oversight and collecting soil samples. As of October 5, 2018, Western has excavated approximately 1,000 cubic yards of impacted soil and excavation activities are ongoing. Figure 1 depicts the horizontal extent of the excavation as on October 5, 2018. All soil is being disposed of at the Envirotech Landfarm in Bloomfield, New Mexico.

## DEFERMENT REQUEST

The recently installed 3-foot thick reinforced concrete pad is located within the release footprint and impacted soil has been identified beneath it. This recently installed concrete pad is currently empty but is planned to be used for installing an updated and redesigned pump system required for operating the facility. Western has delineated the impacted soil around and beneath the concrete pad (Figure 2 and Table 1). Analytical results from soil sampling indicate that impacted soil is present from directly beneath the concrete pad to a depth of less than 4 feet bgs. Composite soil samples collected from the excavation walls surrounding the concrete pad indicate the majority of impacted soil from this area has been removed, with small portions still exceeding the NMOCD remediation action levels as indicated by grab samples: S. Trench Sec. 5 East Wall Grab; S. Trench Sec. 2 Under Slab Grab; S. Trench Sec. 2 Under Slab #1; and S. Trench Sec. 2 Under Slab #2 (Figure 2).

In accordance with New Mexico Administrative Code (NMAC) 19.15.29.12 C. (2), Western is proposing to leave in place approximately 140 cubic yards of impacted soil beneath the concrete pad in place until facility closure and deconstruction or when construction activities at the Site allow for access to the impacted soil beneath the concrete pad. Western has excavated as close as possible to the edge of the concrete pad without compromising the structural integrity of the pad. Composite soil samples collected from each excavation sidewall and floor surrounding the concrete pad contain no concentrations of BTEX or TPH exceeding NMOCD standards. Grab samples collected from under the concrete pad via horizontal boring contain concentrations of total BTEX ranging from below laboratory detection limits to 168.72 mg/kg in S. Trench Sec. 2 Under Slab Grab. Concentrations of total TPH in soil samples from under the concrete pad range from below laboratory detection limits to 56,020 mg/kg in S. Trench Sec. 2 Under Slab Grab.

Based on data presented in this report, Western requests permission to backfill the areas identified on Figure 1 to allow safe access to the concrete pad. Excavation and remediation activities will continue in areas that are not compliant with NMOCD standards to the north, east, and west; these areas are identified on Figure 1.

Excavation and soil sampling activities, including information presented in this deferment request and subsequent soil removal, will be included in a closure report to be submitted to the NMOCD when remaining remediation activities are complete.

Sincerely,

LT ENVIRONMENTAL, INC.

NMOCD Remediation Action Levels		10	NE	NE	NE	50	NE	NE	NE	100	600

**Notes:**

BTEX - benzene, toluene, ethylbenzene, and total xylenes

bgs - below ground surface

mg/kg - milligrams per kilogram

NE - not established

NMOCD - New Mexico Oil Conservation Division

TPH - total petroleum hydrocarbons

**Bold** - indicates result exceeds NMOCD remediation action level

< - indicates result is below laboratory reporting limits

## Analytical Report

### Report Summary

Client: Western Refining Wholesale  
Chain Of Custody Number:  
Samples Received: 9/13/2018 4:58:00PM  
Job Number: 07232-0026  
Work Order: P809027  
Project Name/Location: Hospah

Report Reviewed By:

Date: 9/18/18

Walter Hinchman, Laboratory Director

Date: 9/18/18

Tim Cain, Project Manager

Report Reviewed By:

Envirotech Inc. certifies the test results meet all requirements of TNI unless footnoted otherwise.  
Statement of Data Authenticity: Envirotech, Inc. attests the data reported has not been altered in any way.  
Partial or incomplete reproduction of this report is prohibited, unless approved by Envirotech, Inc.  
Envirotech, Inc. currently holds the appropriate and available Utah TNI certification NM009792018-1 for the data reported.

#### Notes and Definitions

Surr2	The surrogate recovery for this sample cannot be accurately quantified due to interference from coeluting organic compounds present in the sample extract.
SPK1	The spike recovery is outside of quality control limits.
D1	Duplicates or Matrix Spike Duplicates or Laboratory Control Sample Duplicates Relative Percent Difference is outside of control limits.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
RPD	Relative Percent Difference
**	Methods marked with ** are non-accredited methods.

Partial or incomplete reproduction of this report is prohibited, unless approved by Envirotech, Inc.

#### Notes and Definitions

CV4	CV recovery was above quality control limits. This target analyte was not detected in the sample.
CV2	CV recovery was above quality control limits.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
RPD	Relative Percent Difference
**	Methods marked with ** are non-accredited methods.

Partial or incomplete reproduction of this report is prohibited, unless approved by Envirotech, Inc.

RE: Hospah

OrderNo.: 1810332

Dear Matt Krakow:

Hall Environmental Analysis Laboratory received 2 sample(s) on 10/5/2018 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to [www.hallenvironmental.com](http://www.hallenvironmental.com) or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Freeman", is written over a horizontal line.

Andy Freeman
