Re: Injection Pressure Increase IPI 330
Langlie Mattix PSU
Unit No. 18-3
Lea County, New Mexico

Dear Sir:

Reference is made to your request of March 7, 1986 to increase the surface injection pressure on your Langlie Mattix PSU Unit No. 18-3 Well. This request is based on a step rate test conducted on the well on March 3, 1986. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on this well is justified at this time.

You are therefore authorized to increase your surface injection pressure on the following wells.

<u>Well & Location</u>	<u>Maximum Injection Surface Pressure</u>
Langlie Mattix PSU Unit No. 18-3 Section 26, T-22S, R-37E Lea County, New Mexico	1050 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or it is endangering any fresh water aquifers.

Sincerely,

R. L. STAMETS
Director
