Attention: J. A. Schaffer

RE: Injection Pressure Increase Myers Langlie Mattix Unit Lea County, New Mexico

Dear Mr. Schaffer:

Reference is made to your request dated October 18, 1988, to increase the surface injection pressure on the Myers Langlie Mattix Unit Well Nos. 165 and 183. This request is based on step rate tests conducted on these wells during September and October, 1988. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following wells.

WELL AND LOCATION

MAXIMUM INJECTION SURFACE PRESSURE

MLMU Well No. 165 Unit K, Section 4, Township 24 South, Range 37 East, NMPM, Lea County, New Mexico. 1190 PSIG

MLMU Well No. 183 Unit O, Section 4, Township 24 South, Range 37 East, NMPM, Lea County, New Mexico. 1140 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. LeMay

Director
