If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

There was a hole in the 90 ell which was caused by internal corrosion. The spill site will be delineated and a remediation plan will be submitted to the NMOCD & BLM for approval.

Describe Area Affected and Cleanup Action Taken.*

The spill area covered ~ 20'X25' sprayed area, ~ 54'X90' pooled area, 84'X60' pooled area, all on dry sandy pasture with no cows present. Picked up the free fluid with vacuum truck. Surface remediation of the spill site was done which consisted of plowing and discing in gypsum and humate, reseeded with BLM seed appropriate to the area, watering the spill site, and closing it.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
