Letter of Violation

Dear Sir:

A C-141 was received by the New Mexico Oil Conservation Division (NMOCD) Hobbs office 2/22/2006. The Release Notification and Corrective Action Form (C-141) indicated a leak at the Langlie Mattix Unit -SWD Battery of 125 bbls of oil. Since the C-141 was filed, Betwell has not submitted a remediation plan for the spill. The remediation plan must include a site investigation plan including delineation of contamination both horizontally and vertically. The remediation plan must include a start date not less than **30 days after the receipt of this letter** and clean up to the NMOCD guidelines for the Remediation of Spills and Leaks. Information on the guidelines may be found on the NMOCD website. (www.emnrd.state.nm.us/ocd)

If there are any questions contact Chris Williams, NMOCD Hobbs District Supervisor at 505-393-6161 X102.

Sincerely

A handwritten signature in cursive script that reads "Chris Williams".

Chris Williams

NMOCD District 1 Supervisor

CC: Cheryl O'Connor, NMOCD Attorney
Ruben Ramos, Property Manager -Trustees of the Jal Public Library Fund
