Culpepper Martin 7S

Unit O – Sec 31 – T32N – R12W

The Culpepper Martin 7S is a new drill Fruitland Coal well which is proposed to be commingled with the Fruitland Sand. A cased hole gamma ray log will be run prior to the completion to identify the Fruitland Sand, and Fruitland Coal zones.

Fruitland Sand and Fruitland Coal Allocation

If the Fruitland Sand and Fruitland Coal intervals can be isolated, a separator test will be performed and the allocation for each zone will be assigned with the rates determined during the separator test using the subtraction method. In the event the Fruitland Sand and Fruitland Coal can not be isolated and tested separately, a volumetric calculation will be performed to determine the allocation percentages between the Fruitland Sand and the Fruitland Coal.

All documentation will be submitted to the Aztec NMOCD office.
