Dear Ms. Wrotenberry:

This is a request for administrative approval for downhole commingling of the production from the captioned formations.

We have attached for your review, an acreage plat outlining the dedicated acreage and a proposed allocation formula with a short discussion of the history of the well.

All royalty and overriding royalty owners are being notified of this application by certified return receipt mail. Copies of the letters are enclosed.

Thank you for your consideration and approval of this application. If you have any questions or concerns please do not hesitate to contact the undersigned.

Sincerely,

Cathleen Colby

Richardson Operating Company
WF Federal 5-2
Commingling Application

The WF Federal 5-2 is a newly drilled Basin Fruitland Coal/Twin Mounds Pictured Cliffs well. This is part of Richardson's development program in their WF (West Farmington) field. This is the first Pictured Cliffs and Fruitland Coal well in this section. The closest Fruitland Coal offset is Richardson's Bushman Federal 6-1 (located in Unit P, Sec. 6, T29N, R14W), which was approved for downhole commingling of the Fruitland Coal and Pictured Cliffs formations in Order No. R-10810.

Based on recent Richardson Operating wells in this township, it is anticipated that both zones will have similar bottom hole pressures of approximately 200 psi. Both zones produce some water and no liquid hydrocarbons. Neither zone is fluid sensitive and fluids from the two zones are compatible.

Since neither zone has enough data to prepare a reliable production forecast, or predict the ultimate reserves, Richardson Operating proposes to allocate the production based on the initial production rates from the Pictured Cliffs. The well will be perforated and stimulated in the Pictured Cliffs formation. The stimulation will then be cleaned up and the well flow tested. The production based on the flow test will establish the Pictured Cliffs base rate. The Fruitland Coal formation will be completed separately but it will be produced with the Pictured Cliffs. The Fruitland Coal production will be the total measured production minus the Pictured Cliffs production.

Assuming a 7% decline rate from the Pictured Cliffs, the proposed allocation formula is as follows:

Pictured Cliffs Production = Pictured Cliffs base rate $\times e^{(-Dt)}$, where $D = 7\%/yr$ and t = time in years since first production.

Fruitland Coal Production = Total Production – Pictured Cliffs production.
