Gentlemen:

The above referenced well is a Pictured Cliffs/Mesaverde/Dakota commingle. Attached is a copy of the allocation for the commingling of the subject well completed on November 27, 2001. DHC-2888 was issued for this well.

Gas:	Pictured Cliffs	3%
	Mesa Verde	60%
	Dakota	37%

Oil:	Pictured Cliffs	0%
	Mesa Verde	0%
	Dakota	100%

These percentages are based upon reserves assigned to each formation founded on production from the respective formations before and after workover operations. Because an increase was not seen in condensate with the addition of the Mesaverde formation, condensate remains allocated solely to the Dakota formation. Please let me know if you have any questions.

Sincerely,

Peggy Cole
