Mr. A. L. Porter, Secretary and Director
Oil Conservation Commission
Box 871
Santa Fe, New Mexico

Dear Mr. Porter:

This is to request administrative approval of an unorthodox location to be located in the South Blanco Extension Pictured Cliffs Pool, San Juan County, New Mexico.

The well, our Storey No. 5-C is to be located 401' from the North Line and 362' from the West Line of Section 35, Township 28 North, Range 9 West, N.M.P.M., San Juan County, New Mexico. The northwestern corner of this quarter section contains a draw between shale cliffs and the remainder of the quarter section is broken shale and sandstone slopes which would make the cost of an orthodox location prohibitive.

The well is to be a Pictured Cliffs completion and since El Paso Natural Gas Company holds the lease to the West and North the approval of other operators has not been sought.

I am enclosing two copies of the Certified Well Location Plat sketching terrain conditions and two copies of our Intention to Drill.

Sincerely yours,

E. J. Coel
Senior Petroleum Engineer

Well No. 5-C is located 401 ft. from N line and 362 ft. from W line of sec. 35

NW Section 35 28N 9W NMPM
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
So. Blanco P.C. Extension San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6184 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well thru the Pictured Cliff formation using rotary tools and to perforate and water fracture possible producing zones. Estimated Total Depth 2460'.

Casing Program:

9 5/8" at 120' with 125 sacks regular cement circulated to surface.
5 1/2" at 2460' with 75 sacks regular cement, 75 sacks Pozmix.

The NW/4 of Section 35 is dedicated to this well.
NW/4, SF 077111.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Attention: Mr. E. J. Coel

Administrative Order NSL-56-A

Gentlemen:

Reference is made to your application for approval of an amended unorthodox well location for your Storey Well No. 5-C to be located 1973 feet from the North line and 402 feet from the West line and in the SW/4 NW/4 of Section 35, Township 28 North, Range 9 West, South Blanco-Pictured Cliffs Gas Pool, San Juan County, New Mexico.

It is our understanding that this unorthodox well location is based upon extreme topographic conditions in the NW/4 of said section.

Inasmuch as you are the only offset operator, it is possible for immediate approval to be granted. Therefore, by authority granted me under provisions of Rule 4 of the Special Rules and Regulations of the South Blanco-Pictured Cliffs Gas Pool, as set forth in Order R-565-C, you are hereby granted an exception to Rule 3 of Order R-565-C for the above described unorthodox well location. You must also obtain like approval from the U. S. Geological Survey.

Very truly yours,

A. L. Porter, Jr.

Oil Conservation Division

Attention: Mary Corley
corleym@bp.com

Administrative Order NSL-56-B

Dear Ms. Corley:

Reference is made to the following: (i) your application dated December 1, 2004 that was submitted to the New Mexico Oil Conservation Division ("Division") on December 6, 2004 (***administrative application reference No. pSEM0-434247240***); and (ii) the Division's records in Santa Fe and Aztec, including the files on Division Administrative Orders NSL-56 and NSL-56-A: all concerning BP America Production Company's ("BP") request for a non-standard Basin-Fruitland coal gas well location for the existing Storey "C" LS Well No. 5 (**API No. 30-045-07018**) located 1973 feet from the North line and 402 feet from the West line (Unit D) of Section 35, Township 28 North, Range 9 West, NMPM, San Juan County, New Mexico. Lots 1 and 2, the NW/4, and the N/2 SW/4 (W/2 equivalent) of Section 35 is to be dedicated to this well in order to form a standard 323.65-acre stand-up gas spacing unit for the Basin-Fruitland Coal (Gas) Pool (**71629**).

This application has been duly filed under the provisions of: (i) Rule 7 (b) of the "***Special Rules and Regulations for the Basin-Fruitland Coal Gas Pool***," as promulgated by Division Order No. R-8768, as amended; (ii) Division Rule 104.F, revised by Division Order No. R-11231, issued by the New Mexico Oil Conservation Commission ("Commission") in Case No. 12119 on August 12, 1999; and (iii) Rule 1207.A (2), revised by Division Order No. R-11205, issued by the Commission in Case No. 12177 on June 17, 1999.

By Division Administrative Order NSL-56-A, dated July 30, 1956, El Paso Natural Gas Company received authorization to drill to and complete the above-described Storey "C" LS Well No. 5, then designated the Storey Well No. 5, in the South Blanco-Pictured Cliffs Pool (**72439**) at an unorthodox gas well location within a standard 160-acre gas spacing unit comprising the NW/4 of Section 35.

It is the Division's understanding that BP now intends to abandon the Pictured Cliffs interval at this time and recompleat up-hole into the Basin-Fruitland Coal (Gas) Pool. However, pursuant to Rule 7 (a) (1) of the Basin Fruitland coal gas special pool rules, the location of this well is also considered to be unorthodox for the subject 323.65-acre stand-up coal gas unit.

By the authority granted me under the applicable provisions of the special pool rules governing the Basin-Fruitland Coal (Gas) Pool and Division Rule 104.F (2), the above-described unorthodox coal gas well location is hereby approved.

Jurisdiction of this cause is retained for the entry of such further orders as the Division may deem necessary.

Sincerely,

Mark E. Fesmire, P. E.
Director
