Dear Sir:

As provided in Order No. R-179-3, Rule 4B, Escrito (Gallup) Field, San Juan County, New Mexico, Dorfman Production Company requests administrative approval to drill the Nancy Federal No. 2 on an unorthodox location. This will be a Gallup (oil) completion located 2090 ft W of the E line and 990 ft N of the S line of Sec. 12, T24N, R8W, San Juan County.

The location is requested in order that we may keep a better spacing pattern between our wells. Our Nancy Federal No. 1 is located 790 ft from the E and S lines of Sec. 12. A regular location for our No. 2 well would place these wells 1060 ft apart, and we would like to have at least 1300 ft spacing between same.

Our reason for desiring to drill in the S/2 of this 80 acre unit is the result of the Marvin Ake - Ake 1-11 just completed in Sec. 11-24N-8W. By electric log, this well did not have the main producing Gallup sand in the Escrito Field. This determines that either the sand bar ends prior to reaching this well or has turned in a northly or westerly direction. Assuming the bar has turned, we have determined it to be in a westerly direction and desire to drill the well in the S half of the 80 acre unit to determine this fact and if possible keep adequate spacing between wells.

We have not had this location surveyed as will be noted from the attached sketch. We will, of course, have a survey made if the application is approved

Ray Smith, Compass Exploration Company, and Marvin Ake are our offset operators and copies of this letter have been forwarded to them. We have, also, requested of them a waiver of protest. We hold under lease the Gallup rights under all of Sec. 18-24N-8W, San Juan County.

Yours very truly,

DORFMAN PRODUCTION COMPANY
