Application for Non-Standard Location, Re: Indian Basin-Upper Pennsylvanian Gas Pool, John H. Trigg, et al, #1-8 Federal Azotea Mesa Well, 743' FNL, 1055' FWL Section 8, T 22S, R 24E, N.M.P.M., Eddy County, New Mexico

Gentlemen:

Please consider this our formal application to you for administrative approval for the drilling of the subject well at the subject non-standard location in the subject field.

On March 10, 1965, Mr. Gene Snow, our Production Superintendent, and Mr. G. E. Harrington, our geologist, accompanied the John W. West Engineering Company's survey party to the Indian Basin Gas Field area. At that time we selected the drillsite at the only feasible location in the northwest quarter of the section. It was readily established that a location anywhere else in the quarter section would be prohibitively expensive to construct due to extreme relief and the amount of blasting which would be required. Another factor considered in this selection, which factor is also predicated upon topography, was that of safety and accessibility should any difficulty with high pressure gas and threatened blow-out and fire be encountered. Topographically, the drillsite selected affords us maximum advantage to combat any such problem which might occur. Mr. W. A. Gressett of your Artesia office visited the proposed location on March 11, 1965. At that time he examined the area thoroughly.

Rule 5 of the Special Rules and Regulations for the pool requires all offsetting operators be notified of the application. We hereby state that such has been done and enclosed herewith are copies of the letters which accomplished this notification together with waivers we have thus far received. Attached please find an itmeized list of material furnished at this time in connection with this application.

Plans are to communitize all of the subject section as to the Upper Pennsylvanian Formation. Several meetings and telephone discussions have been held with various working interest owners and all seem to be in general

JOHN H. TRIGG COMPANY

New Mexico Oil Conservation Commission Page -2-April 8, 1965

agreement. The matter of the location seems to be the first step; then the instrument of communitization. We realize that no allowable will be assigned this well until the interests have been consolidated.

Thank you for your many courtesies in this matter. If additional information is required, we would appreciate your advising us as soon as possible.

Very truly yours,

ack R. mundelf

HALE OF

Gentlemen:

By way of supplemental information which accompanied our application of April 8, 1965, in connection with the subject area, we hand you herewith waivers from Ralph Lowe and Marathon. We are awaiting the return of the waivers from Phillips (acreage in Section 16) and from Pan American (acreage in Sections 17 and 18).

We are hopeful that the waivers from these two companies will be forthcoming soon.

Very truly yours,

Jack R. Mundell Landman
