Attention Mr. A. L. Porter, Jr.

Re: Avance Oil & Gas Company, Inc.,  
State ETA #2, 1980' FSL & 660' FEL,  
Section 8, T-16-S, R-35-E, Lea County,  
New Mexico, Undesignated - Gas Well

Gentlemen:

Avance Oil & Gas Company, Inc. respectfully requests that a non-standard 320 acre proration unit be assigned their recent Morrow Gas discovery at the above captioned location. We request that the South-half (S/2) of Section 8 be assigned the subject well as shown on the attached plat. This well would be located on the proposed proration unit 660' from the end and 1980' from the side, whereas, statewide rules stipulate 660' from the side and 1980' from the end of a standard 320 acre unit.

The State ETA #2 was a re-entry of the Shell Oil Company #2 State ETA originally completed in the Wolfcamp. We deepened the well to the Devonian as our primary objective. The Devonian was dry and we subsequently plugged back to the Morrow sand.

In view of these circumstances, we feel a non-standard proration unit for this well to be a reasonable request.

Yours very truly,

AVANCE OIL & GAS COMPANY, INC.

*Walter Jenkins*
