RECEIVED
DEC - 6 1971
NEW MEXICO CONSERVATION COMM.

Dear Sir:

Gulf Oil Corporation request your administrative approval for an unorthodox location for our Learcy McBuffington No. 7, located 660' FSL & 990' FWL, Section 13, T-25-S, R-37-E, Lea County, New Mexico, to produce gas from the Justis (Glorieta) gas pool. This well is presently producing as a single completion from the Justis Tubb-Drinkard zone, however, we have made application for permission to dually complete as a Justis Glorieta gas well with existing Justis Tubb-Drinkard, Case No. 4631, December 1, 1971.

1. Applicant believes the completion of this well in the Justis Glorieta Pool represents reasonable development in this pool.
2. The application is in the interest of conservation and prevention of waste.
3. Copies of this application were mailed to offset operators of this proration unit on December 2, 1971.

Thank you for your consideration and if additional information is needed, please advise.

Yours truly,

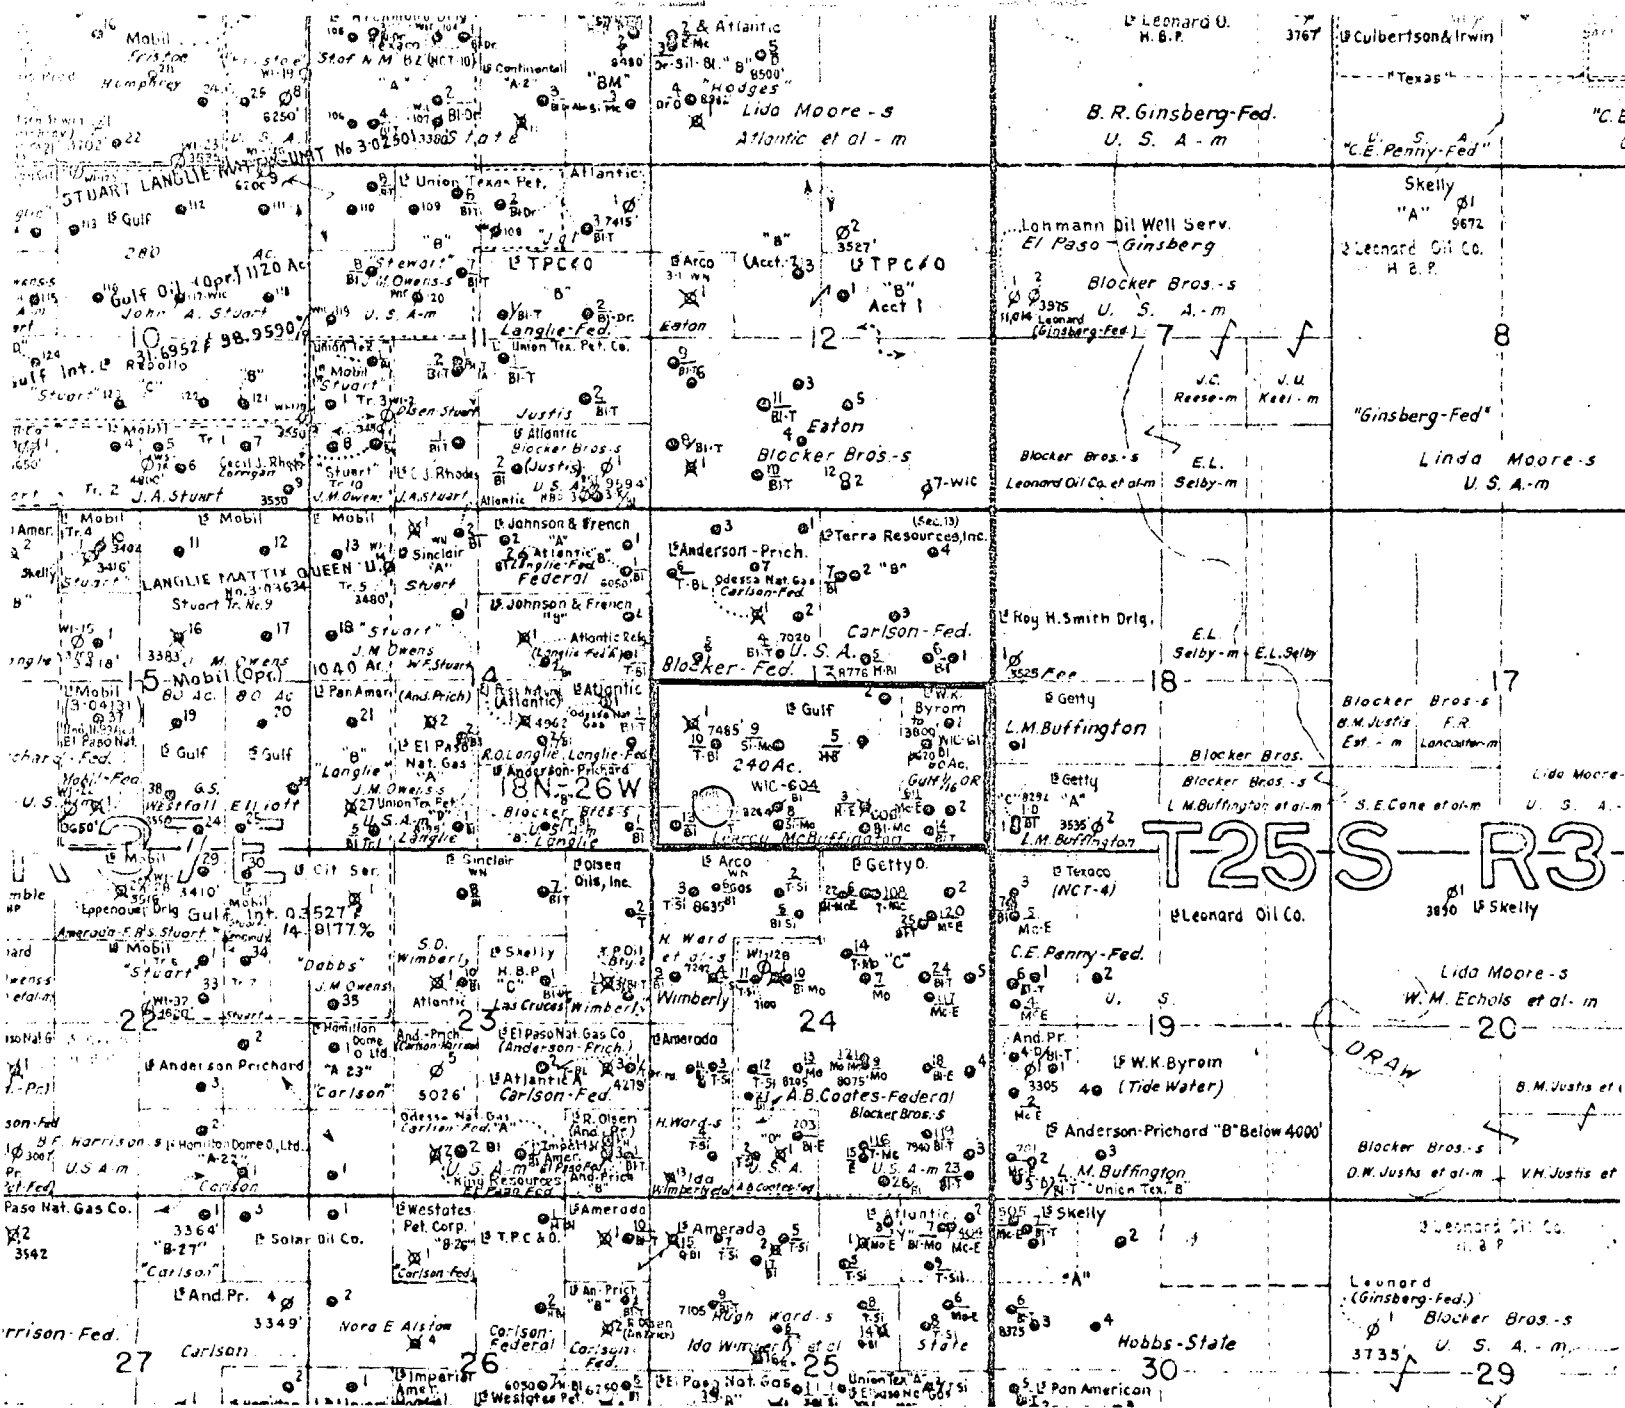

By 

C. D. BORLAND
