Describe Cause of Problem and Remedial Action Taken.*

The leak resulted from internal corrosion to a 2" steel line on the discharge of the circulating pump. The MSO shut down the pump and called a vacuum truck to pick up the free liquids.

Describe Area Affected and Cleanup Action Taken.*

A 75' X 170' area of pad and pasture were affected. No cows were present. The spill site will be delineated and remediated in accordance with NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
