*ADMINISTRATIVE ORDER NO. PMX-222*

***APPLICATION OF SOUTHWEST ROYALTIES, INC. TO EXPAND ITS  
PRESSURE MAINTENANCE PROJECT IN THE FLYING 'M' SAN ANDRES  
POOL IN LEA COUNTY, NEW MEXICO***

**ADMINISTRATIVE ORDER  
OF THE OIL CONSERVATION DIVISION**

Under the provisions of Division Order No. R-3229, Southwest Royalties, Inc. has made application to the Division on August 14, 2003 for permission to expand its Flying "M" San Andres Unit Pressure Maintenance Project in the Flying 'M' San Andres Pool in Lea County, New Mexico.

**THE DIVISION DIRECTOR FINDS THAT:**

- (1) The application has been filed in due form.
- (2) Satisfactory information has been provided that all offset operators have been duly notified of the application.
- (3) No objection has been received within the waiting period as prescribed by Rule 701(B).
- (4) The proposed injection wells are eligible for conversion to injection under the terms of Rule 701.
- (5) The proposed expansion of the above referenced pressure maintenance project will not cause waste nor impair correlative rights.

**IT IS THEREFORE ORDERED THAT:**

The applicant, Southwest Royalties, Inc., is hereby authorized to utilize the following two (2) wells to inject water for purposes of pressure maintenance into the San Andres formation through 2 3/8-inch plastic lined tubing set in packers located within 100 feet of the uppermost injection perforations.

Flying "M" San Andres Unit Well No. 271,  
API No. 30-025-22034, 2120 FSL & 2120' FEL, (Unit J) Section 28,  
Interval: 4,498 – 4,530, Packer at 4,448, **Maximum Injection Pressure 900 psi.**

Flying "M" San Andres Unit Well No. 017,  
API No. 30-025-24756, 659 FSL & 1991' FEL, (Unit O) Section 29,  
Interval: 4,356 – 4,427, Packer at 4,300, **Maximum Injection Pressure 871 psi.**

Both in Township 9 South, Range 33 East, NMPM, Lea County, New Mexico.

IT IS FURTHER ORDERED THAT:

The operator shall take all steps necessary to ensure that the injected water enters only the proposed injection interval and is not permitted to escape to other formations or onto the surface.

Prior to commencing injection operations into the wells, the casing shall be pressure tested from the surface to the packer setting depth to assure the integrity of said casing.

The casing-tubing annulus shall be loaded with an inert fluid and equipped with a pressure gauge at the surface or left open to the atmosphere to facilitate detection of leakage in the casing, tubing or packer.

The injection wells or system shall be equipped with a pressure limiting device which will limit the wellhead pressure on the injection wells to no more than .2 psi per foot to the uppermost injection perforation or open-hole interval.

The Director of the Division may authorize an increase in injection pressure upon a proper showing by the operator of said wells, that such higher pressure will not result in migration of the injected fluid from the San Andres formation. Such proper showing shall consist of a valid step-rate test run in accordance with and acceptable to this office.

The operator shall notify the supervisor of the Hobbs district office of the Division of the date and time of the installation of injection equipment and of the mechanical integrity tests so that the same may be inspected and witnessed.

The operator shall immediately notify the supervisor of the Hobbs district office of the Division of the failure of the tubing, casing or packer in said wells and shall take such steps as may be timely and necessary to correct such failure or leakage.

The subject wells shall be governed by all provisions of Division Order No. R-3229, as amended and Rules 702-706 of the Division Rules and Regulations not inconsistent herewith.

PROVIDED FURTHER THAT, jurisdiction is retained by the Division for the entry of such further orders as may be necessary for the prevention of waste and/or protection of correlative rights or upon failure of the operator to conduct operations (1) to protect fresh water or (2) consistent with the requirements in this order, whereupon the Division may, after notice and hearing, terminate the injection authority granted herein.

The injection authority granted herein shall terminate one year after the effective date of this order if the operator has not commenced injection operations into the well, provided however, the Division, upon written request by the operator, may grant an extension thereof for good cause shown.

DONE at Santa Fe, New Mexico, on this 9th day of September 2003.
