Re: Request for Unorthodox Location
Sulimar Queen Unit TRACT I-13
Section 24-T15S-R29E, Chaves
County, New Mexico
990' FSL & 150' FWL

Gentlemen:

Stephens Engineering, the consulting firm for the Sulimar Queen Waterflood Unit, has recommended the drilling of the captioned test in order to effect a more economical recovery from the Sulimar Queen Unit. This well, if productive, will drain an area that otherwise would not be produceable.

The proposed well is within the Unit boundary, and there is no offset production outside of the Sulimar Queen Unit.

This letter is to request your approval under your Order No. R-4290. This well has been approved by both the USGS and the Bureau of Land Management.

Very truly yours,

Jack D. McClellan
