Sec. 25, T-27-N, R-8-W, San Juan County

We may not process the subject application for non-standard location until the required information or plats checked below (is) (are) submitted.

A plat must be submitted clearly showing the ownership of the offsetting leases.

A statement must be submitted that offset owners have been notified of the application by certified mail.

A plat must be submitted fully identifying the topography necessitating the non-standard location.

To tell you the truth, we didn't send them certified -- that's why it didn't show up on the letters we sent to you. We have received approval from all but two operators and we will send them a certified copy of the letter if necessary. It's been awhile since we drilled in New Mexico, guess we forgot some of the rules and regulations. What do we need to do now in order to get approval for the non-standard location since we obviously dropped the ball in the first place?

Dear Mr. Stamets:

Pursuant to our conversation of May 29, 1979, we have sent a certified letter to the two remaining offset operators regarding the unorthodox locations of the Federal E #1-A and the Federal E #4. Please be advised that this is our third request to Atlantic Richfield and Western Oil and Minerals.

We have previously submitted to you the approval letters of William G. Russell, El Paso Natural Gas Company, and Great Lakes Chemical Corporation. These three letters should be a part of your files.

Should you have any further questions please contact me.

Very truly yours,
