Re: Request for Approval  
of Non-Standard Location  
Robinson Bros. No. 1-M  
San Juan County, New Mexico

Dear Sir:

Consolidated Oil & Gas, Inc. hereby requests your approval to drill a dual infill well in the Blanco Mesaverde and Basin Dakota pools at a non-standard location for each pool. Consolidated proposes to drill its Robinson Bros. No. 1-M at a point 2220' FWL and 820' FSL of Section 34, Township 32 North, Range 13 West, N.M.P.M., San Juan County, New Mexico, dedicating thereto the S/2 of Section 34.

This request for approval of a non-standard location is necessitated by topographical considerations. As seen on the enclosed topographical map, Attachment A, the well site lies between two irrigated fields. Movement of the well site to the west to conform with the location requirements as set forth in Rule 2 (B) of Order No. R-1670-V would place the well site some 300' into an irrigated field, thus causing disruption of the landowner's farming activity and of necessity removing a portion of the field from cultivation. Therefore, since this location will fulfill the requirement of Rule 2 (B) that any infill Dakota well be a minimum of 920' from the existing well on a proration, the non-standard location will cause the least disruption to the existing environment and as seen on Attachment B, Consolidated is the only offset operator to this proration unit, we ask that this non-standard location be approved.

Hold for  
notice to offset  
called perham 7-2-79

Your prompt attention and approval of this non-standard location is greatly appreciated. Should there be any questions regarding this matter, please contact me at the above address or phone (303) 861-5252.

Very truly yours,

CONSOLIDATED OIL & GAS, INC.
