Rule 5 Order  
R5643  
8-29-79*

Dear Mr. Ramey:

Please be advised that Harvey E. Yates Company hereby makes application for administrative approval of an unorthodox location, pursuant to Rule 104-F, for its Travis State Com #1 well located 1780 feet from the South line and 2080 feet from the West line of Section 13, Township 18 South, Range 28 East, N.M.P.M., Eddy County, New Mexico. The Travis State Com #1 well was drilled as a Morrow test at an orthodox location for 320 acres spacing consisting of the S/2 of said Section 13. The well was unproductive in the Morrow and Atoka formations and was subsequently plugged back to the Canyon formation and completed as an oil well. This well is situated within one mile of the Travis Upper Penn Pool, and is subject to the special pool rules applicable to said pool which require 80 acres spacing, and well to be located within 150 feet of the center of the 4/4 involved. The location of the well does not fall within this provision, and therefore we request approval of an unorthodox location.

Attached hereto as Exhibit A is a Location Plat showing the ownership of all leases offsetting the proposed proration unit. We are sending all off set lease owners copies of this letter and exhibit by certified mail and request that if they have no objection to the proposed unorthodox location, that they advise you directly and forward a copy of such waiver to this office.

Sincerely,

Robert H. Strand  
Attorney
