Application for Unorthodox Well Location  
Infill Basin Dakota Well Pos 1  
Mary Wheeler #2  
892' FSL & 624' FWL  
Sec. 23, T-30, R-12W  
San Juan County, New Mexico

By this verified application submitted in triplicate, Manana Gas, Inc. requests approval of an unorthodox location for its Mary Wheeler #2 to be located 892' FSL & 624' FWL of Section 23, T-30, R-12W. Permissible location for a Dakota Well must be at least 790' from the outer boundary line of the 320 acre proration unit.

The reason for the unorthodox location is topographical. We want to drill this well as near as possible to the SW corner of this half section. A 790' location would put us in the middle of the Animas River. Our proposed location would be as near to the river as possible, but still 166' short of meeting 790' FWL minimum requirement.

The adjacent operators to this location are as follows:

|                            |                        |                        |
|----------------------------|------------------------|------------------------|
| Amoco Production Company   | Beta Development Co.   | Manana Gas, Inc.       |

|                            | Attn: Doyle Baxter     |                        |

All affected offset operators are being notified by certified mail of this unorthodox location request. If no affected offset operator has an objection, we ask that each operator so signify on three copies of this letter in the space provided below, sending one copy to you at the NMOCC, one copy to me, and retaining the third copy for their

own files. In the absence of any objection from an affected offset operator within twenty days, and provided you have no objection to this application, we will appreciate receiving your administrative approval of this letter application. Of course, if there is an objection, please set the matter for hearing, after giving proper notice.

Your favorable consideration would be appreciated.

With best personal regards.

Very truly yours,

MANANA GAS, INC.

Re: Offset Operators Notification - Non - Standard Unit  
Gallegos Canyon Unit

Gentlemen:

Energy Reserves Group, Inc. as sub-operator of the Gallegos Canyon Unit, Pictured Cliffs participating area proposes to drill well Gallegos Canyon Unit, number 295, SW $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 10, T28N R12W.

Section 10 is a non-standard sized section due to the public land survey. The SW $\frac{1}{4}$  consists of 135.93 acres. (Please see attached letter, survey plat and topographical map).

If there are no objections to the proposed non-standard unit, we would appreciate your signature in the below listed space and forwarding this letter to the New Mexico Oil Conservation Division in Santa Fe.

Very truly yours,  
ENERGY RESERVES GROUP, INC.

William J. Plant  
Field Services Administrator

Amoco Production Company has no objection to the proposed non-standard unit as planned by Energy Reserves Group, Inc.

Gentlemen:

I have examined the application dated 11-29-79  
for the Manana Gas, Inc. Mary Wheeler #1-E, M-23-30N-12W  
Operator Lease and Well No. Unit, S-T-R

and my recommendations are as follows:

Approve 1 @ 892' FSL, 624' FWL.

The application shows the well number to be  
#2; however, for a Dakota infill it should  
be #1-E.

Yours very truly,

AR Hendricks
