If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The leak was approximately a 1/4 inch hole of unkonw causes in the body of the top joint of the 2 3/8" production tubing string with the hole located between the tubing slips and the Pumping Tee. The site will be delineated and remediated in accordance with NMOCD guidelines.

Describe Area Affected and Cleanup Action Taken.*

The spill site covered ~ 27'X64' of damp caliche well head pad and ~ 35'X85' of damp black soil/caliche rock pasture. There were no cows present. A vacuum truck was called to pick up the uncontained fluid.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
