Pumper was working on the heater treater and forgot to open the water leg when he was through with his work. All produced fluid went to the oil tank and floated 15 BO our the thief hatch.

Describe Area Affected and Cleanup Action Taken.*
All fluids were contained inside the diked area. A mixture of fertilizer and Oil Gator will be mixed into the soil and watered in.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
