Gentlemen:

Chevron U.S.A. Inc. respectfully requests administrative approval for an unorthodox location for the captioned well. Proposed location is 50' FWL and 1400' FSL of Section 3, T-17S, R-32E. Reason for the unorthodox location is to prevent waste by recovery of otherwise unrecoverable oil. It is believed that this can be achieved because of the previous 5-spot waterflood injection pattern.

As an offset operator, to the North of the Quarter-Quarter Section, Cima Capitan, Inc. will be notified by registered mail of our intent to drill at this location.

If further information is required, please contact Mr. B. R. Graham at the letterhead address or at (915) 684-4441 collect.

Yours very truly,
