Attention: Division Director

Dear Sir:

Anadarko Production Company respectfully requests administrative approval to drill the Ballard Grayburg San Andres Unit Well #10-6 at an unorthodox location 2050 feet from the north line and 260 feet from the west line of Section 4, Township 18 South, Range 29 East, Eddy County, New Mexico. The Ballard Grayburg San Andres Unit waterflood was authorized March 16, 1973 by Order Number R-4493. Paragraph 6 of this order provides for administrative approval of such unorthodox locations.

The proposed well will be completed as a producer in the Grayburg zone. The location will be closer than 330 feet to an inner subdivision boundary, therefore making it unorthodox. It will, however be located further than 330 feet from the Unit boundary. A producing well is required in this area to produce waterflood oil not recoverable from existing wells. The location was originally planned for 360 feet from the west line but the presence of a power line in the vicinity required the well to be moved to the proposed location 260 feet from the west line.

Attached is a map of the unit and form C-102 showing the proposed unorthodox location. Thank you for your consideration of this matter.

Yours very truly,

*Cris G. Rhodes*
