RE: Turrentine Oil & Gas Application  
Sawyer Deep #1 API 30-025-21199

Mr. Jones:

As per your letter, find within the additional notice as you requested. Also, as we discussed, Turrentine is really only interested in the lower San Andres as a disposal zone, but is requesting the maximum allowed open hole portion that the OCD will approve without running a line. The base of the lower San Andres is at approximately 5800 feet. Please consider this request.

If you have any questions, please call.

Thanks,

TOP GLORIETA = 5600'  
Will Jones
