NATURE OF RELEASE

Type of Release	produced water	Volume of Release	625 bbl water	Volume Recovered	610 bbl fluid
Source of Release	Well head	Date and Hour of Occurrence	06/11/07 11:30 AM	Date and Hour of Discovery	06/11/07 11:30 AM
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Pat Caperton (left message on answering machine)		
By Whom?	Tejay Simpson	Date and Hour	6/11/07 3:30 pm		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Working on finding an 8" fiberglass line with a Hydrovac truck, when the truck struck a four inch riser while backing in between tanks/breaking it off at ground level. Most of the fluid was contained inside of the injection station with the other running down our road. We had a backhoe on location that built a berm to help control the spill. Call out 3 vacuum trucks and picked the standing water up. The fluids were taking to a third party disposal.

Describe Area Affected and Cleanup Action Taken.*

Affected area approximately 2' x 200' that ran down the road and the rest was contained inside our injection station. We are going to back drag the roadway and do cosmetic clean up inside of the injection station.

Chlorides of the water are 34,170 ppm

NEED INFO ON STATUS OF CONTAMINATED SOILS

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
