Describe Area Affected and Cleanup Action Taken *
The affected area was the diked area of the tank battery & an area on the south east corner of the tank battery located out side of the diked area measuring 14'x25'. The impacted soil from the release was excavated and hauled to Lea Land Inc. The excavated area was treated with micorblaze. Soil samples will be taken for analytical & submitted to a second party lab. When analytical results report TPH & B-tex to be under the RRAL for the site. Yates Petroleum Corporation will submit a final C-141 form requesting closure for the release that occurred on 6/9/2007.
Depth to ground water < 100', Wellhead protection area > 1000', Distance to surface water body > 1000' (Site ranking 20.)

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
