Lybrook Gallup Oil

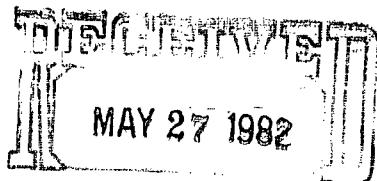

Gentlemen:

Byron Oil Industries hereby respectfully applies for administrative approval of an unorthodox location for the above well. The location upon which this well was drilled was chosen due to topography. The well is located in a general area of extremely rough terrain. A canyon that is approximately 150' deep and approximately one-quarter of a mile wide, lies approximately 70' south of the location.

In support of this approval, please find the following:

1. USGS topographic map for the area in question
2. A lease owner map, showing the Dunn Federal No. 2 and offset ownership
3. A copy of form C-102, "Well Location and Acreage Dedication Plat."

All outside operators have been notified by certified mail as of May 28, 1982. Please note that the ownership map shows Petroleum Consultants as being an offset lease holder. Petroleum Consultants interest in the area has been purchased by Grace Petroleum Corporation, and we have accordingly notified them.

STATE CONSERVATION DIVISION
SANTA FE

Mr. Harold Elledge, who acted as our agent in the permitting of this well, has discussed this unorthodox location with Mr. F.T. Chavez of your Aztec office.

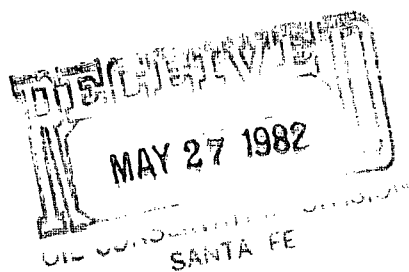

Should you have any questions regarding this approval, please contact Mr. Elledge at (505)-632-3385, or myself at (303)-457-9483.

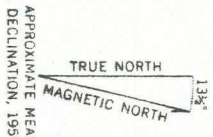

Respectfully yours,

Jack E. Vaughn
