RE: Texland Petroleum, LLC
Grimes 29 Injection Facility
Tank Ran Over

Mr. Williams:

Texland Petroleum, Greg Mendenhall at (817)336-2751, has asked me to file a work plan for the above mentioned facility. On July 11, a tank ran over in the West Hobbs area. Texland did file a C-141, and is in the process of containing spill. Texland would like to begin remediation of any contamination which was caused by the mishap. Attached is Work Plan.

If you have any questions, please call.

Sincerely,

A handwritten signature in black ink, appearing to read "Eddie W. Seay", with a long, sweeping underline that extends to the right.

WORK PLAN

General:

On July 11, 2007, the North tank at the Grimes 29 water injection facility began running over. Alarms failed to shut down operations. Approximately 10 to 12 barrels of fluid was lost on caliche pad and off location. All available fluids were picked up and alarm repaired. Work has been started to remediate site, per Chris Williams.

Groundwater:

According to the water information, the depth of groundwater occurs at approximately 40 ft.

Remediation Proposal:

All available fluid was picked up or burned up. Our cleanup proposal will be to excavate and haul the contaminated soil to an OCD approved facility. After contaminated soil has been removed, the area will be sampled for final cleanup, and only after OCD approval, we will backfill, level and seed. Hungry Horse Services will be doing the excavation.

Ranking Criteria Score - 30

Shallow groundwater and location of spill. This site has a 100 ppm cleanup and will cleanup chloride per OCD.

Pump went down; alarm didn't work. Tank ran over. repaired pump vacuum up oil. backhoe pushing up soil to stabilize area.

Describe Area Affected and Cleanup Action Taken.*

will file work Plan. area affected 30x40 caliche

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
