oil well

Attention: Mr. Joe D. Ramey, Division Director

Dear Sir:

It is respectfully requested that Union Texas Petroleum Corporation be granted administrative approval to drill the Mangum No. 7 well on a non standard location due to topographical reasons and the proximity of the Hammond Irrigation Ditch.

The proposed well would be located 220 feet from the South line and 1109 feet from the West line of Section 28, Township 29 North, Range 11 West, N.M.P.M., San Juan County, New Mexico. Our intention is to drill this well to the Gallup formation and complete it as a Gallup single.

The on site inspection reveals that any standard location in this drilling unit would be situated in an area of steeply dipping terrain or on the Hammond Ditch. We have spotted the well in the only location available in this drilling block that avoid's these features.

We have attached copies of letters to companies which own leases off-setting this proposed well seeking their respective companies concurrence with this non-standard location.

Yours very truly,

UNION TEXAS PETROLEUM CORPORATION
