*Administrative Order NSL-2345-A*

Dear Ms. Bradfield:

Reference is made to your application dated June 15, 1995 for a non-standard Basin-Fruitland coal gas well location for your existing Starr Well No. 3M (API No. 30-045-26783) which was drilled in 1987 and dually completed in both the Blanco-Mesaverde and Basin-Dakota Pools at an unorthodox gas well location for both intervals (approved by Division Administrative Order NSL-2345, dated May 21, 1987) 2280 feet from the North line and 1180 feet from the West line (Unit E) of Section 5, Township 26 North, Range 8 West, NMPM, San Juan County, New Mexico.

It is our understanding that both the Mesaverde and Dakota intervals will be plugged back and abandoned and said well will be recompleted up-hole as a single Basin-Fruitland Coal (Gas) Pool well, which pursuant to the "*Special Rules and Regulations for the Basin-Fruitland Coal (Gas) Pool*", as promulgated by Division Order No. R-8768, as amended, is also unorthodox. Further, Lots 1 through 4 and the S/2 N/2 (N/2 equivalent) of said Section 5 shall be dedicated to the well to form a standard 321.56-acre gas spacing and proration unit for said pool.

By the authority granted me under the provisions of Rule 8 of said Order No. R-8768, as amended, the above-described unorthodox coal gas well location is hereby approved.
