RE: Application of Union Oil Company  
of California dba Unocal for a non-  
standard Location of an existing well  
recompletion to the Basin Fruitland  
Coal (Gas) Rincon Unit #19, 1650'  
FNL & 990' FWL, SW/4 NW/4, Sec. 30,  
T27N-R6W, Rio Arriba County, NM  
SF079364

Dear Mr. Lemay:

Union Oil Company of California dba Unocal hereby makes this application for administrative approval for a non-standard location to the Basin Fruitland Coal (Gas) formation as per Rule 8, Special Rules and Regulations for the Basin Fruitland Coal Gas Pool. The subject well, located in the NW/4 Sec. 30, T27N-R6W, was originally drilled to the Blanco Pictured Cliffs South formation and is no longer productive. It is proposed to plug back the Pictured Cliffs formation and recomplete uphole to the Fruitland Coal formation.

Since this well is located in the NW/4 of the section it is off pattern and therefore non-standard in the Basin Fruitland Coal.

As Unocal is the operator of all offset acreage no letters have been sent to any other operators notifying them of this application.

A map of the lease is attached to this application showing offset operators and owners.

Also attached is a new C-102 showing the 320 acre dedication to the Basin Fruitland Coal.

Union Oil Company of California requests that the Director approve this application for a non-standard location.

Respectfully submitted,

Union Oil Company of California  
dba UNOCAL
