Re: Administrative Order NSL 2837 Dated July 30, 1990
Administrative Order NSL 3011 Dated May 13, 1991
Falcon Seaboard gas Company

Gentlemen:

The above referenced Administrative Orders were issued for two different Falcon Seaboard Gas Company Basing Fruitland Coal wells on the dates noted. These wells have not been drilled.

When making application for the the pipeline ROW with the Forest Service the well locations were found to be incorrectly listed on the original application for NSL. Attached for your review are the new C102 plats showing the correct well locations.

On behalf of Falcon Seaboard Gas Company we are asking for an amendment to the original administrative orders listed to cover the corrected well locations.

The 29-4 Carson 19 # 1 location was originally listed at 2120 feet from the North line and 950 feet from the East line (Unit H) of Section 19, Township 29 North, Range 4 West NMPM. The new location is actually located 1910 feet from the North line and 655 feet from the East line. The location is closer to the East line, however, Falcon Seaboard Gas Company is the operator of Section 20.

The 29-4 Carson 10 # 1 location was originally listed at 1337 feet from the North line and 398 feet from the east line (Unit H) of Section 10, Township 29, Range 4 West, NMPM. The actual location is 1495 feet from the North line and 690 feet from the East line.

Please advise of your determination as soon as possible. If you need additional information, please call me at (505) 327-7259.

Sincerely,

R. D. Simmons
