Re: Application of Thomas Ray Sivley for an
Unorthodox Oil Well Location, Filed August 9,
1991

Dear Mr. Stogner:

On August 9, 1991, the above-referenced application was received by the Oil Conservation Division. Applicant is the operator of all the proration units adjoining the subject proration unit to the east, south and west. Mr. Sivley in fact operates the entire south half of Section 28. The north half of Section 28 is operated by Union Oil Company. I am enclosing a waiver of objection to my client's application for an unorthodox well, executed on behalf of Union Oil Company. Pursuant to Rule 104(F)(4), we would request that the Commission approve said unorthodox location. If there is further information that you require before said application can be granted, please advise.

Very truly yours,

LOSEE, CARSON, HAAS & CARROLL, P.A.

Re: Application of Thomas Ray Sivley for an
Unorthodox Oil Well Location, No. 10379

Dear Mr. Stogner:

Pursuant to our conversation of today, I am enclosing herewith a land plat, a letter from N. Raymond Lamb, Engineer, and a geological map which shows that the need for the unorthodox location is geologically motivated.

If there is anything else I can provide to you, do not hesitate to let me know.

Very truly yours,

LOSEE, CARSON, HAAS & CARROLL, P.A.

Re: Application of T. R. Sivley for Unorthodox
Location, Section 28, Township 20 South,
Range 34 East, N.M.P.M., Lea County, New
Mexico

Dear Mr. Carroll:

The application for subject unorthodox location identified the producing zone as "Lynch Formation." This identity is commonly used in the field but for your records, the pool is "Lynch," the formation is primarily "Seven Rivers" and secondarily "Yates" formations.

The Seven Rivers is the usual dolomite with vuggy porosity some 75' below the top of formation.

The accumulation is from an anticlinal structure with an active water drive energy from the flank of the structure. The operator has proposed a well on the apex of the structure to recover oil that would otherwise not be recovered.

Very truly yours,

N. Raymond Lamb

Permit No. 14-2920-91-K

Report Number: NMAS-1991-29-O

ABSTRACT

New Mexico Archaeological Services, Inc., representing THOMAS R. SIVLEY, undertook an additional Class III survey of Bureau of Land Management land scheduled to be impacted by the construction of a drill location and its associated access road. Field work was conducted under sunny conditions with high, thin cirrus, and light southeasterly winds during the morning. The proposed location will measure 400 X 400 ft (actual area surveyed 4.44 acres). The access road will measure 100 X 75 ft (actual area surveyed 0.34 acre). Total surveyed acreage 4.78 acres. They will be situated in Section 28, T20S, R34E, NMPM, Lea County, New Mexico. No cultural properties were recorded during these surveys; therefore, NMAS is suggesting clearance for all proposed work.

Introduction

On 20 October 1991, New Mexico Archaeological Services, Inc., (NMAS), Carlsbad, (Permit Number: 14-2920-91-K), undertook for THOMAS R. SIVLEY, an expanded archaeological survey of federal land administered by the Bureau of Land Management in Lea County, New Mexico. The reconnoitered area will be impacted by the construction of a drill location and its associated access road. These surveys were undertaken by Dr. Haskell.

Survey Technique

For these investigations, THOMAS R. SIVLEY's proposed location was reconnoitered for evidence of man's past activities by walking it in a series of 8.0 m wide, close interval (15° or less), zigzag transects. In addition, an added zone extending 20 ft on each side of the staked 400 X 400 ft location, and lying outside the bounds of the proposed work area, was reconnoitered by a similar means. The access road was walked in two, 15 m wide transects. At its juncture with the existing lease road, the surveyed area was broadened to embrace an area measuring 100 X 150 ft. Lath is considered to be the center of the proposed road. Methodologically, this procedure served to promote optimal conditions for the visual examination of the area to be impacted by construction-related activities. Field work was conducted under sunny conditions with high, thin cirrus and light southeasterly winds during late morning. Ground visibility ranges between 75 and 85%. Field time 25 minutes.

Federal Silver Well No. 2

Location

The proposed location will measure 400 X 400 ft (actual area surveyed 4.44 acres) on federal land and will be situated 1600 ft from the east line and 1500 ft from the south line.,

Section 28, T20S, R34E, NMPM, Lea County, NM

Thus it will be situated in the:

NW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 28, T20S, R34E, NMPM, Lea County, NM

The associated access road will measure 100 X 75 ft (actual area surveyed 0.34 acre) and will be situated in the:

NW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 28, T20S, R34E, NMPM, Lea County, NM

Map Reference: USGS LEA QUADRANGLE, 7.5 Minute Series, 1984.

Level of Previous Impact

The location is bordered by a pipeline on the south.

Cultural Resources

Prefield: 15 October 1991, Section 28 (no archaeological sites), T20S, R34E, Arita K. Slate.

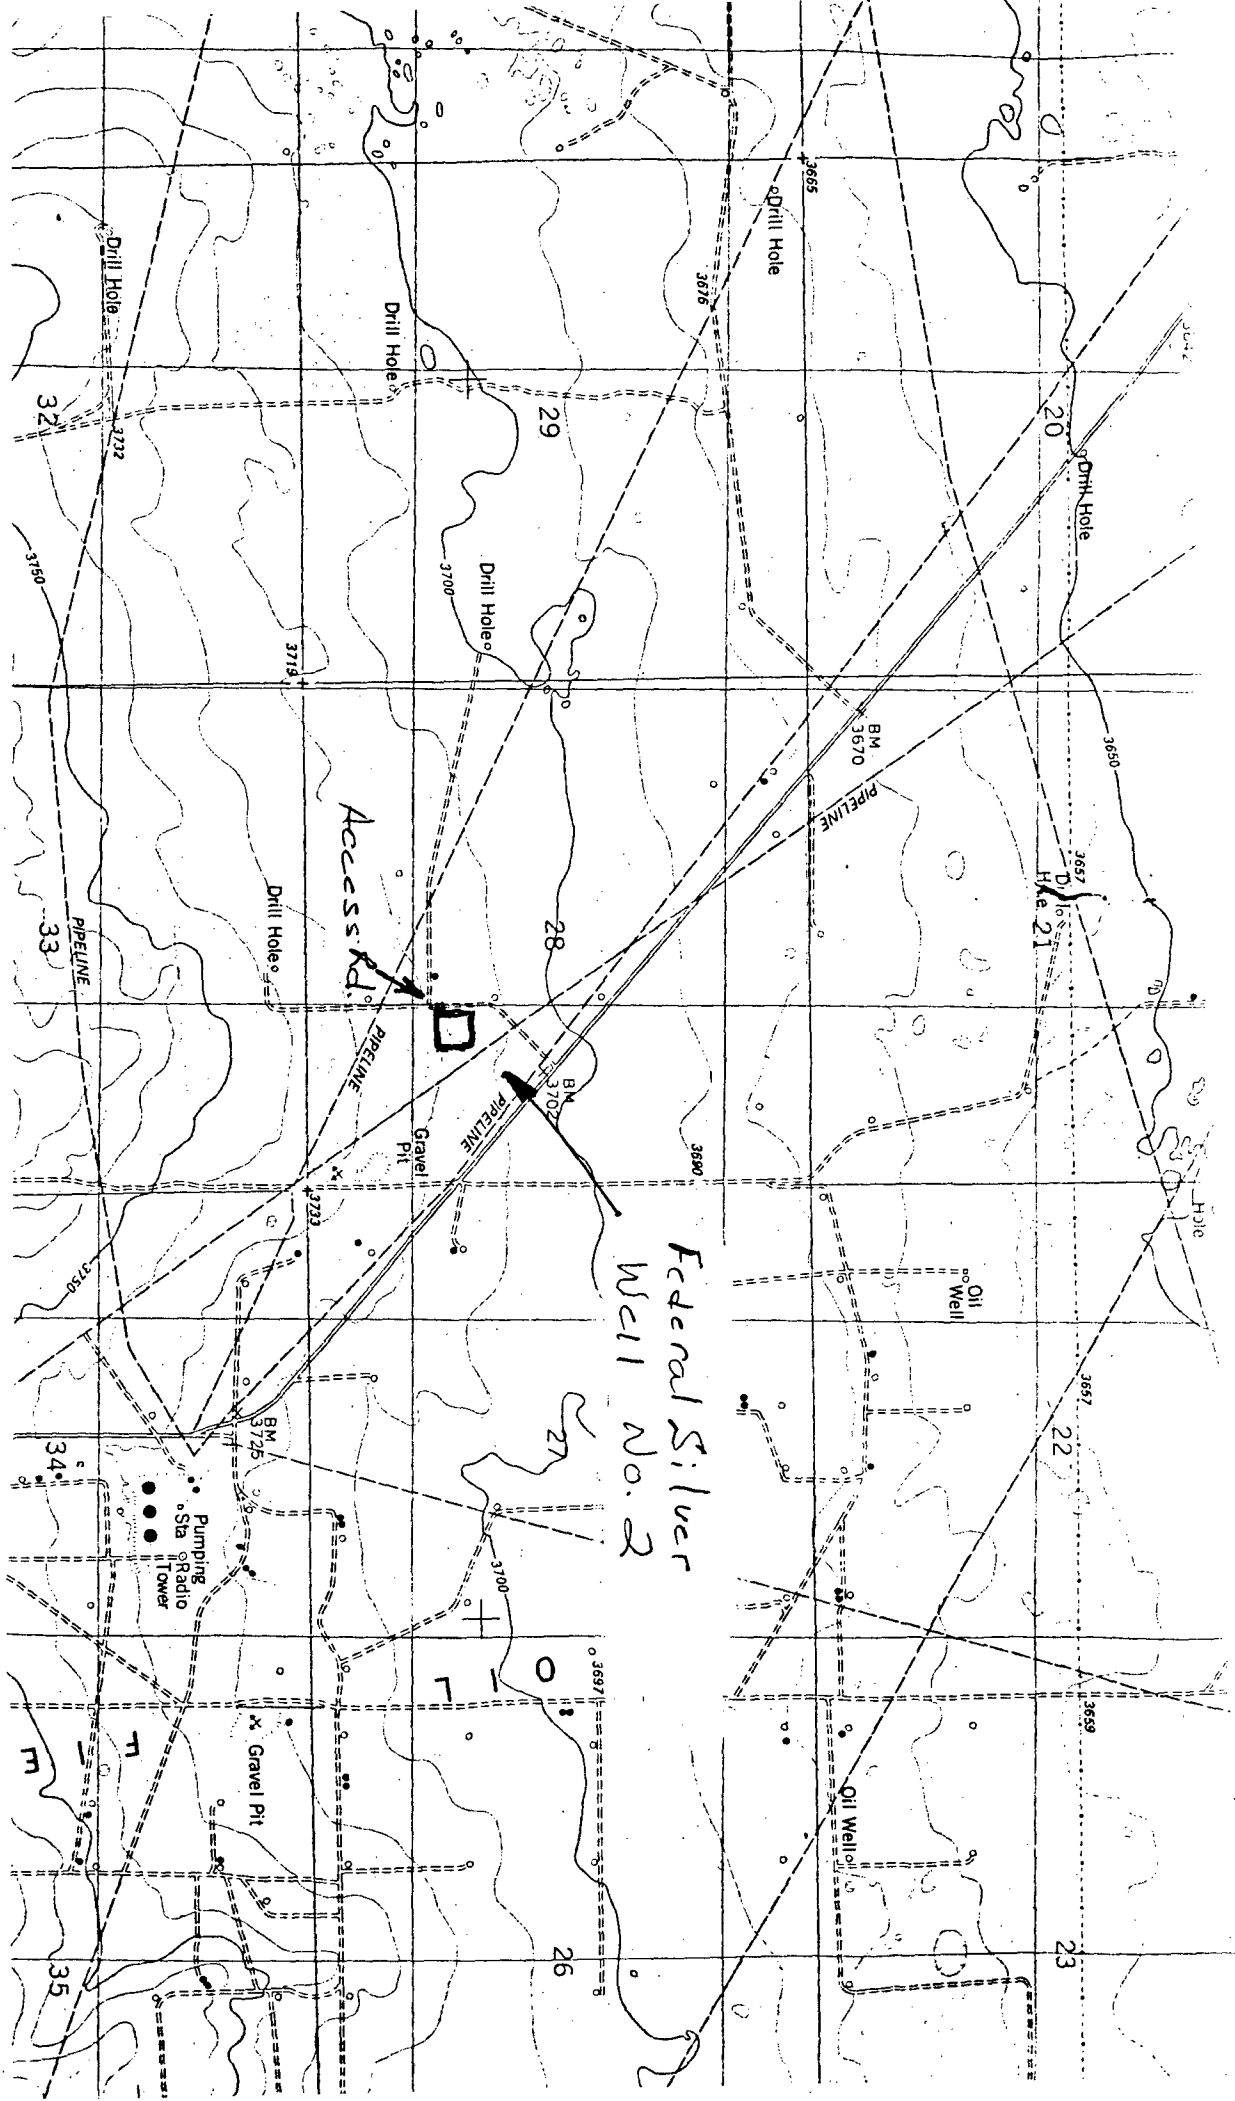

No cultural properties were recorded during the course of this survey. Albeit not encountered, expected cultural properties, should they occur, should include isolated, random occurrences of debitage, cores, angular debris, projectile points, scrapers, gravers, etc. Isolates, always occurring on a random, non-patterned basis, reflect en passant utilization of the landform in the past.

Recommendations

NMAS recommends clearance for THOMAS R. SIVLEY's proposed Federal Silver Well No. 2 and its access road and suggests

that work-related activities proceed in accordance with company plans (Fig. 1). Clearance, of course, is granted by the Bureau of Land Management. If cultural resources are encountered during construction, the BLM and NMAS should be notified immediately. Duned settings are notorious for covering and uncovering cultural properties.

**SUBJECT: Federal Silver Lease, Well No. 2, S28-T20S-R34E,
1600 FEL & 1500 FSL (Amend location: 100' North
from original approved location)**

Dear William,

As per instructions from; Jerry Sexton, OCD, Hobbs, Texas & New Mexico Pipeline and the BLM we are informing you of our desire to move/amend the location of the Federal Silver Lease No. 2, to 100 ft. North of the approved location, (**Administrative Order: NSL-3057, Case No. 10379**) in order to skirt an existing gathering line.

As per the instructions of Berry Hunt, BLM, Carlsbad, New Mexico we have done the following in order to comply with State and Federal regulations: (i) Re-Survey the location and have the **1600 FEL & 1500 FSL** staked by John West, Hobbs, NM, (ii) have a new **Archaeological Study** done by **NMAS, Carlsbad, NM**, (iii) have a letter of confirmation from; Jessie Hildebrand, **Texas & New Mexico Pipeline** saying that they have no objections to us building the drilling pad which skirts their existing gathering line. (All of the above are included for your records.)

We have tentatively scheduled a drilling rig for; **Nov. 4, 1991**, so we will have to build the road and pad the last week of October. If there are any problems with this change please let me know at your earliest convenience.

Sincerely,

Thomas R. (Bob) Sivley

WELL LOCATION AND ACREAGE DEDICATION PLAT

All Distances must be from the outer boundaries of the section

Operator THOMAS R. SIVLEY			Lease FEDERAL SILVER		Well No. 2
Unit Letter J	Section 28	Township 20 SOUTH	Range 34 EAST	County LEA	NMPM
Actual Footage Location of Well: 1600 feet from the EAST line and 1500 feet from the SOUTH line					
Ground level Elev. 3714.3	Producing Formation		Pool	Dedicated Acreage: Acres	

1. Outline the acreage dedicated to the subject well by colored pencil or hatchure marks on the plat below.
2. If more than one lease is dedicated to the well, outline each and identify the ownership thereof (both as to working interest and royalty).
3. If more than one lease of different ownership is dedicated to the well, have the interest of all owners been consolidated by communitization, unitization, force-pooling, etc.?
☐ Yes ☐ No If answer is "yes" type of consolidation _____
If answer is "no" list the owners and tract descriptions which have actually been consolidated. (Use reverse side of this form if necessary).
No allowable will be assigned to the well until all interests have been consolidated (by communitization, unitization, forced-pooling, or otherwise) or until a non-standard unit, eliminating such interest, has been approved by the Division.
